FRESADORA COMBI

# COMBI

Fresadora manual, model COMBI, equipada con tecnología de centro de mecanizado. Fresa, taladro y sierra.

Manual router, model COMBI, equipped with the technology of a machining centre. Routing, drilling and sawing unit.

Défonceuse manuelle, modèle COMBI, équipée avec la technologie d'un centre d'usinage: fraisage, perçage et scie.

Manuelle Fräsmaschine, Modell COMBI, ausgerüstet mit der Technologie eines Bearbeitungszentrums. fräst, bohrt und sägt.

FRESADORA CB-ME

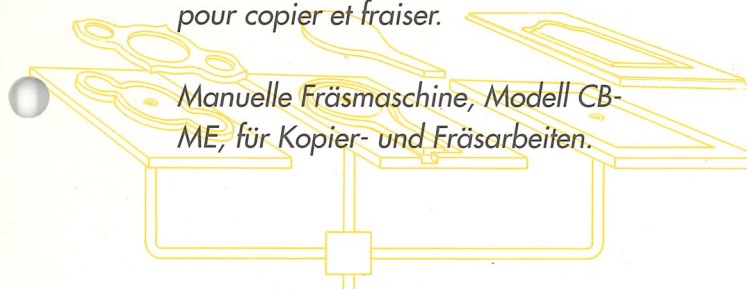

# CB-ME

Fresadora manual, modelo CB-ME, para trabajos de copiado y fresado.

Manual router, model CB-ME, for copying and routing.

Défonceuse manuelle, modèle CB-ME, pour copier et fraiser.

Manuelle Fräsmaschine, Modell CB-ME, für Kopier- und Fräsarbeiten.

# Freasa

FRESADORA FCF

# FCF

Fresadora modelo FCF estándar y especial para mecanizar el contorno de ataúdes.

Standard and special router machine, model FCF, for the machining of coffins.

Défonceuse standar et spéciale, modèle FCF, pour l'usinage de cercueils.

Fräsmaschine, Modell FCF, Standard- und Spezialausführung für das Bearbeiten der Konturen von Särgen.

FRESADORA FCN

# FCN

Fresadora, modelo FCN, de gran robustez ideal para realizar escaleras, piezas náuticas, caravanas, etc.

Router machine, model FCN, with a heavy duty construction ideal to produce staircases, nautical pieces, caravans, etc.

Défonceuse, modèle FCN, d'une très grande robustesse destinée à la production d'escaliers, pièces nautiques, caravanes, etc.

Fräsanlage mit automatischem Einzug und Einzug und Ausstoß der Teile.

# FCN

# CR

Fresadora robotizada, modelo CR, para prototipos y moldes de gran volumen equipada de 3 a 5 ejes.

*Automated router machine, model CR, for prototypes and high volume-moulds equipped from 3 to 5 axes.*

*Défonceuse robotisée, modèle CR, pour prototypes et moules de grand volume de 3 à 5 axes.*

*Fräroboter, Modell CR, für Prototypen und Formen größeren Volumens, ausgerüstet mit 3 bis 5 Achsen.*

# EURO

Fresadora, modelo EURO, estándar y especial para mecanizar puertas.

*Standard and special router machine, model EURO, for the machining of doors.*

*Défonceuse standar et spéciale, modèle EURO, pour l'usage de portes.*

*Fräsmaschine, Model EURO, Standard- und Spezialausführung für das Bearbeiten von Türen.*

# FRESADORA

FRESADORA EURO

# EURO

Fresadora, modelo EURO, estándar y especial para mecanizar puertas.

*Standard and special router machine, model EURO, for the machining of doors.*

*Défonceuse standar et spéciale, modèle EURO, pour l'usinage de portes.*

*Fräsmaschine, Model EURO, Standard- und Spezialausführung für das Bearbeiten von Türen.*

Fresadora, modelo EURO, adecuada para realizar piezas para escaleras u otros elementos de gran longitud. Equipada con eje C para controlar el fresado angular.

*Router machine, model EURO, designed for the production of pieces for staircases and other large pieces. Machine equipped with a C axis to control the angular routing.*

*Défonceuse, modèle EURO, destinée à la production de pièces pour escalier ou autres éléments de grandes longueurs. Machine équipée avec un axe C pour contrôler le fraisage angulaire.*

*Fräsmaschine, Modell EURO, geeignet für die Herstellung von Teilen für Treppen und andere Elemente größerer Länge. Ausgerüstet mit der Achse C zur Kontrolle der Fräsung von Ecken.*

# LC · LCF

LCF

Lijadoras de molduras, modelo LCF. Lijadoras de cantos, modelo LC. Equipadas con grupos de discos abrasivos o bandas flexibles. Bancadas unilaterales y bilaterales.

Sanding machines for mouldings, model LCF. Sanding machines for edges, model LC. Equipped with abrasive disks and flexible belts. One-way and two-way baseplates.

Ponceuse de moulures, modèle LCF et ponceuse de chants, modèle LC: Équipées avec des disques abrasifs ou des bandes flexibles. Bâtis unilatéraux et bilatéraux.

Schleifmaschine für Profilleisten, Modell LCF. Schleifmaschine für Kanten, Modell LC. Ausgerüstet mit Sets bestehend aus Schleifscheiben oder flexiblen Schleifbändern. Einseitige oder beidseitige Unterbauten.

LCx2

LCx2

La gama para cantos LC ofrece soluciones para afrontar cualquier tipo de necesidad inclusive el fresado con grupos previos al lijado.

The series of sanding machines for edges, model LC, provides solutions for any kind of requirements including routing before sanding.

La série des ponceuses pour chants, modèle LC, sont particulièrement adaptées pour répondre à toutes les exigences incluent le fraisage avec groupe de ponçage.

Die Reihe für die Kanten LC bietet Lösungen für jeden Bedarf, einschließlich der Fräsung mit Sets vor dem Schmirgeln.

LC-2

LC-1

LC-2

# LCA

Recubridora de folio decorativo para cantos, compuesta por grupos de fresado, lijado y grupo recubridor.

Foil stamping machine for edges, equipped with routing, sanding and foil stamping units.

Machine pour l'application de feuilles-décor pour les chants, équipée de groupes de fraisage, ponçage et de feuilles.

Maschine für den Überzug von Kanten mit dekorativer Folie, bestehend aus den Sets für Fräsen und Schmirgeln und dem Set zum Überziehen.

Grupo estampador de cantos.

Foil stamping unit.

Groupe d'application de feuilles.

Set Preßmaschine für Kanten.

Muestras de cantos acabados.

Samples of edges.

Exemples de chants.

Muster von fertiggestellten Kanten.

# TORNO

Torno vertical, copiado por plantilla o controlado por CNC.

Vertical lathe, copying system by template or controlled by CNC.

Tour vertical, système de copie pour modèles ou contrôlé par CNC.

Vertikale Drehbank, Kopieren über Bohrlehren oder von CNC kontrolliert.

# ESTAMPADORAS

# TALADROS

Línea de taladros para bisagradora automática, posicionable a todas las longitudes entre agujeros.

Drill line for automatic hinging machine, which can be adjusted to any length between holes.

Ligne de perçage pour charnières automatique, positionnable à toutes les longueurs entre trous.

Bohranlage für das automatische Bohren der Löcher für Scharniere, verstellbar für sämtliche Löcherabstände

# PUNTAS

Punteadora piramidal de palo redondo.

Tapered profiler with spherical bar

Pointeuse pyramidale pour bâtons ronds.

Mechanismus für das pyramidenförmige Anspitzen von Rundstäben.

Redondeadora de vértices.

Tool for rounding off angular points

Arrondisseuse d'angles.

Maschine zur Abrundung von Ecken.
