## PRESSES FOR GLUING OF LEDGES

# PLS

This model is suitable for those who work with tables or edge-glued panels. The edge-gluing press is equipped with various optionals that change according to the type of working. The edge-gluing press can have a superior or inferior movable plate and moreover can be supplied with manual or automatic loader device. The automatic loader allows the use of the line without the participation of more operators. The operator must only stack the edge-glued panels, then the automatic device let the panels go on, it spreads the glue and put everything on the loader that brings it into the press. Cutting group on the back upon request.
