# MACHINE CONSTRUCTION *rich in TRADITION and COMPETENCE*

We are your reliable and competent partners in recycling.  
We specialize in the construction and production of recycling machinery.  
Our clients are guaranteed the highest standards of quality and flexibility,  
ranging from design to delivery and including turn-key delivery of your plant.

*Your advantages:*

- Our competence and experience in machinery construction gathered over many years
- We constantly apply the latest machine construction technology
- We offer our motivated and committed employees the best possible training and further education
- Tailor-made customer-specific planning, design and implementation of all-inclusive solutions
- All in one go – design, development, construction, and implementation
- Your direct partner from the first contact to the turnkey delivery and handover of the plant
- We assure that our quality is guaranteed by our excellent national network of component suppliers

Andreas Wagner

Alexander Wagner

# OUR HISTORY OF SUCCESS

In 1977 the company was founded by Gerhard Wagner in Neuhaus am Klausenbach, Burgenland, Austria. Their traditional machinery construction is being extended to the construction and production of recycling machinery; with this specialization the company becomes a trendsetter.

In 1978 the first WAGNER "disintegrator" for agroforestry for firewood production was constructed.

In 1992 the first WAGNER single shaft shredder, WS 22, was launched. This was the start of the company's success story, followed by many other innovative shredders.

In 2002 the sole trader became a limited company, WAGNER's Maschinenbau GmbH.

Gerhard Wagner , honorary counsellor of commerce

"From the very beginning, the company was run by my father Gerhard Wagner, honorary counsellor of commerce, and it has been a family business. Along with my mother, my brother Alexander, Elke my wife, and I have been active in the firm. Today we are proud of belonging to one of the most innovative companies in the recycling trade. Many happy customers and renowned reference projects all over Europe and overseas emphasize our long-term success."

(Andreas Wagner, chief executive officer)

# WAGNER'S-SHREDDERS

## for flexible USAGE

WAGNER's technology can handle all types of plastic, textiles, big bag, electronic waste and cable, cardboard boxes, wood, or domestic waste.

A defined granulate is prepared, for a variety of flexible usage such as:

- reuse
- recycling
- production of alternative fuel
- volume reduction
- internal recycling
- thermal application

# WAGNER'S-PERFORATORS

The perforators are used for slitting or piercing PET bottles. This process enables the production of compressed bales with higher density and compactness.

Potential applications:

- in the sorting shaft
- in the compression bale shaft
- on pressing containers

The perforators are individually adjustable to the respective situation.

perforator 10

perforator 32-2

# WAGNER'S TYRE DISMANTLER

The tyre dismantler separates rims and tyres from car wheels. The machine is used on sites where a large quantity of tyres needs to be processed quickly and efficiently.

Advantages:

- powerful hydraulics
- solid design
- high security standard
- high availability and longevity

# WAGNER'S BALE BREAKERS

The bale breaker opens up or disintegrates different types of compressed bales.

Advantages:

- simple handling
- high availability and low maintenance
- freely programmable PLC with operating display
- easy maintenance tools

# WAGNER'S NETWORK PARTNERS

WAGNER machines are used nearly all over the world. This presence is also due to our excellent and reliable sales partners whose number keeps growing. If you want to become part of our rising network, join the club! Do not hesitate to contact us, we are looking forward to getting to know you!
