Professional Solutions for All Woodworking Machinery Needs.

AES Group, which redefines the standards in its sector with the production of wood, marble, plastic and aluminium processing machines, is a Global Company that submits the best service to its customers all around the world since 1989.

As AES Group we are in service with our professional and experienced team in the market. Our global sales network, which covers every country in the world, provides services by expert team in installation, training, maintenance, repair and spare parts sales and guarantees to meet the global customers' needs rapidly and completely. Over 25 years, ever-growing and developing company has been working towards being an indispensable solution partner within our customers by means of our high production capacity, professional personnel, global sales and support network.

With Our New Application;

- You can follow our campaigns and benefit from advantageous prices.
- You can find informations about our products

You can learn information about our products, follow our campaigns and you can earn profit from special advantages for your investments.

NEW PRODUCT

LABEL X

Integrated Production with Full Automatic Labelling Unit

Label X full automatic labelling and alignment system which is working integrated with LINE-R and EXTREME models to make serial production. System working with Cabinet Vision CAD/CAM program.

extreme line

Economic Solution for Serial Production Line

Extreme Line series has been designed to make drilling and routing operations on single machine with special design to prepared for nesting applications. Extreme Line ensures productivity with special desing for serial production.

EXTREME LINE 2132

- 9 kW HSK F63 Spindle Motor
- Boring Unit (10 Vertical - 3x2 Horizontal - 1 Saw Blade)
- Lift and Loading Unit
- Unloading and Cleaning Unit
- Conveyor Unit
- Alphacam Essential 2D CAD/CAM Program
- Rotary Tool Changer Unit (12 Tools Capacity)
- 2x250m³/h Vacuum Pump

NEW DESIGN

SUPER NOVA

Create Economy with Competitive Price

NOVA series present high level solution with special design for nesting applications. It has been designed with high quality components and economic price for your basic level applications

NOVA 1632

- 9 kW HSK F63 Spindle Motor
- Boring Unit (9 Vertical Capacity)
- 250m³/h Vacuum Pump
- Alphacam Essential 2D CAD/CAM Program
- Linear Tool Changer Unit (12 Tools Capacity)

NEW PRODUCT

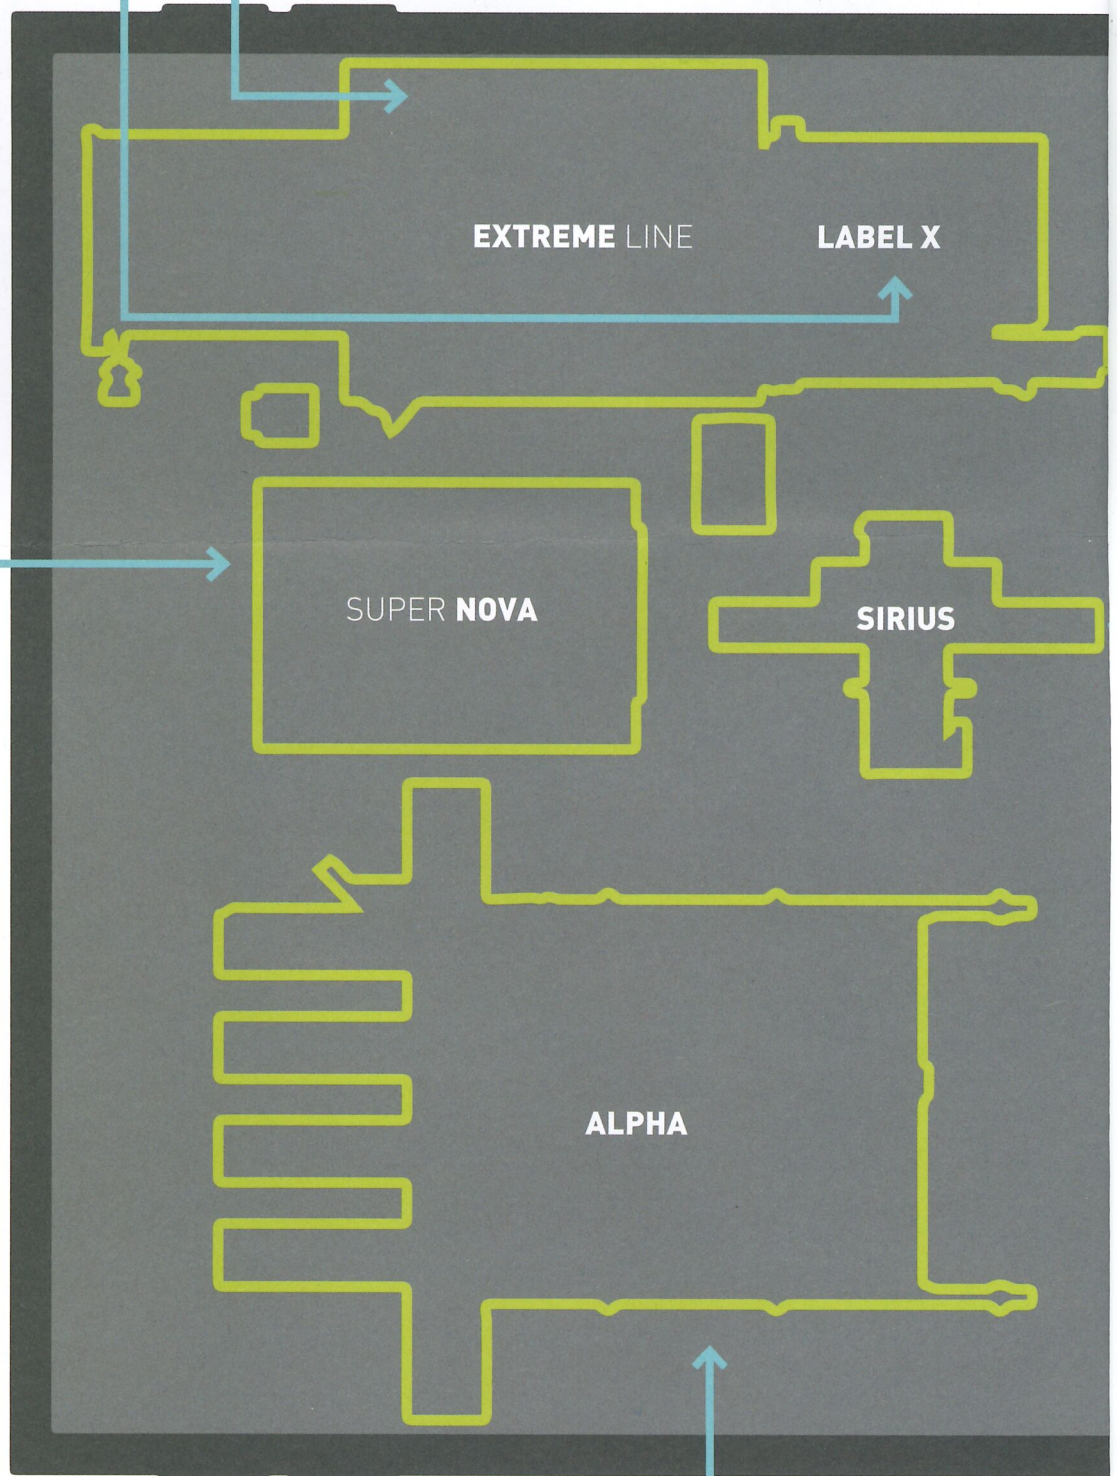

ALPHA

Innovative and High Performance Panel Processing Technology

Alpha is a panel processing center designed by AES Group to make panel processing applications most efficient way. Machine ensures best results on panel cutting works with numerical control and high precision.

ALPHA PS-06 XL

- 27 kW Saw Blade Motor Power
- Rotating Table
- Rear Pusher Bridge
- Automatic or Manual Labelling Unit
- Lift Unit for Automatic Loading
- 80m/min Feeder Bridge Speed
- 150m/min Saw Blade Cutting Speed
- Panel Optimization Program
- Easy Usage, Strong Structure

Our sales and technical team will be at your service for more information about our products.

Fast, Practical and Flexible Solutions for Drilling and Routing Applications

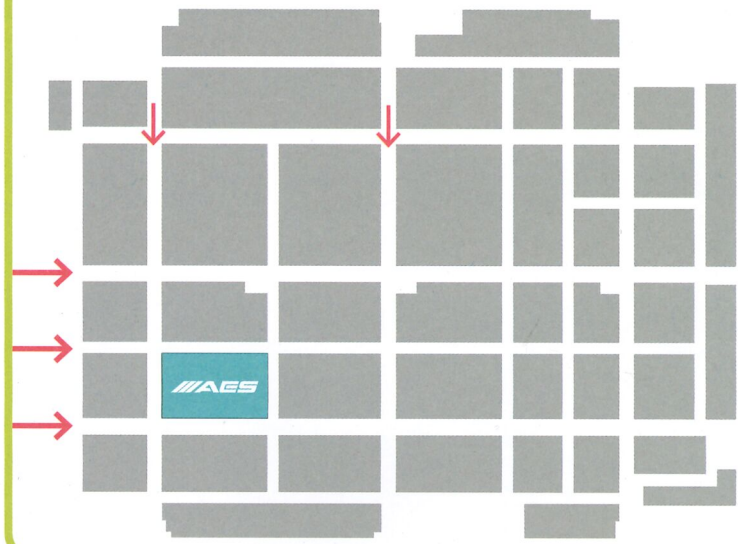

SIRIUS is a numerical controlled drilling machine designed to make drilling and routing operations on the same machine.

SIRIUS 950M ATC

- Boring Unit (10 Vertical – 3x2 Horizontal – 1 Saw Blade)
- 5,5 kW Manual Tool Changer Spindle Motor
- Automatic Tool Changer Unit (6 Tools)
- Alphacam Essential 2D CAD/CAM Program
- AES Drilling Module
- Air Flotation Working Table

HALL 11 E16

NEW DESIGN

Modular Furniture and Door Processing Applications within Single Machine

Vega Evo model has been designed to make wide range production within single machine. It can make modular furniture and door applications at the same time. Machine structure provides flexible solutions with the main spindle, side milling motor and boring unit equipments.

VEGA EVO 1332

- 9kW HSK F63 Spindle Motor
- Boring Unit(10 Vertical – 3x2 Horizontal – 1 Saw Blade)
- 5,5 kW Side Milling Motor
- 100m³/h Vacuum Pump
- Linear Tool Changer Unit(8 Tools)
- Alphacam Essential 2D CAD/CAM Program

NEW PRODUCT

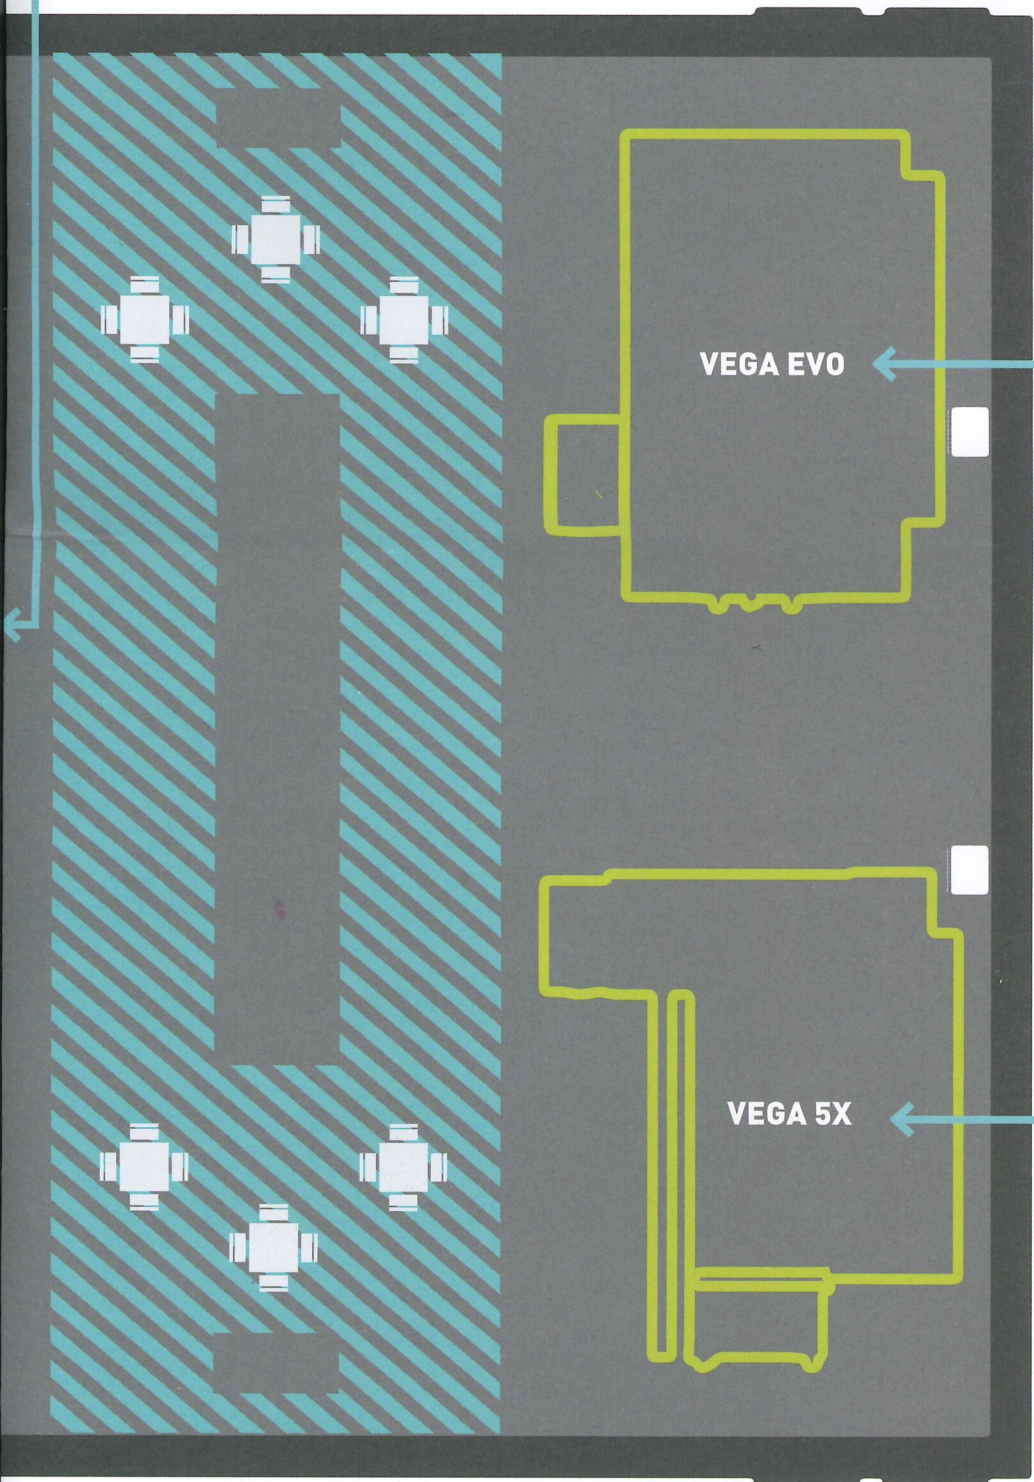

Unique Solution for Most Complex Applications

VEGA 5X model is a 5 Axis machining center designed by AES Group to make most complex applications easy and efficient way. Advanced configuration allows flexible production and ensures excellent results

VEGA 5X 1632

- 7,5 kW 5 Axis Spindle Motor
- Boring Unit(14 Vertical – 3x2 Horizontal – 2 Saw Blade)
- Rotary Tool Changer Unit(12 Tools)
- Linear Tool Changer Unit (14 Tools)
- 140m³/h Vacuum Pump
- Conveyor Belt
- Professional Series Vacuum Consoles (6 Pieces)
- Alphacam 5 Axis CAD/CAM Program

AES GROUP

WORLDWIDE SALES NETWORK

As AES Group target the highest quality with the consciousness of being a world brand and giving the most appropriate solutions to our customers needs by producing innovative and competitive products. We have been covering the demands came from our worldwide customers with our 3.000m² showrooms/branches that are located in Puurs/Belgium and Chicago/USA.

AFTER SALES SERVICES

As AES Group we are in service with our professional and experienced team in the market. Our global sales network which covers every country in the world, provides services by our expert team to global customer's needs and guarantees to answer rapidly and completely.

Installation and Training Services
Maintenance and Repair Services
Spare Parts Services

DEVELOPED PRODUCTION INFRASTRUCTURE

AES Group has been producing products with developed production infrastructure and modern quality control processes conforming to international standards and improving products which meet the demands of the market by means of increasing R&D investments.
