Woodworking machinery

Nina

- Excellent production capacity and low operating costs.
- Ideal for both small and large-sized companies (not mass-produced furniture)
- Room-saving and limited weight.
- Automatic pressing cycle programmed via PLC.
- Sequenced-assembly of different furniture pieces without hand-preparation and no idle time.
- The vertical and horizontal pressing operation make use of an electro-mechanic motor system without the aid of oil- or air-operated cylinders.
- Possibility of adjusting the pressing strength, both vertical and horizontal.
- Manual furniture loading and unloading.
- Low energy consumption (1Kw/hour).
- Totally noise-free.
- Does not require any servicing.
- The machine and electric system are manufactured in compliance with CE standards and are fitted with the relevant protections.

TECHNICAL SPECIFICATION	
Useful length max.	2500 mm.
Useful length min.	200 mm.
Useful height max.	1250 mm.
Useful height min.	200 mm.
Depth max.	650 mm.
Height of worktop	500 mm.
Pressing strength	0-1300 Kp
Voltage	400 / 50 V / Hz
Installed power	3 Kw
Overall weight	1300 Kg
Space occupied	3800x830x2200
Complies with CE standards
