

**THE PANEL SAW  
YOU NEED**

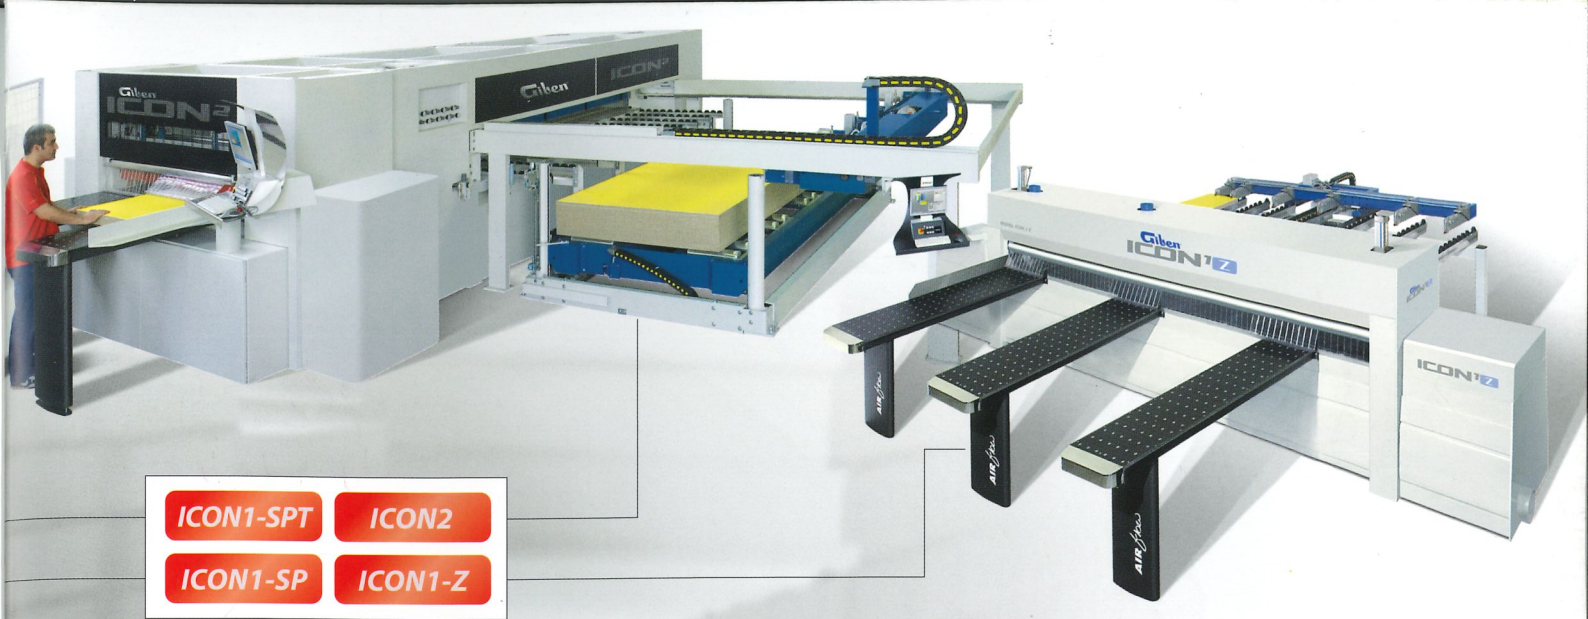

*Do you want top results?  
Choose the model that meets your  
company requirements.*

**new ICON 1 Type-C Series**

**Giben®**

**Giben®**

## *Choose the new Type-C Series: it's a Giben.*

Type-C is a complete series designed to meet every customer requirement, thanks to a wide range of accessories and options that satisfy your demands. Type-C Series includes **ICON1-Z** and **ICON1-SP** models with front loading, **ICON1-SPT** model with automatic loading from lift table and the compact angular system **ICON2**, a unique product that can be installed in a few days and requires the same space of a single line panel saw with lift table.

The brand new **ICON1-Z**, **ICON1-SP** and **SPT** models are top-level panel saws ensuring high speed and absolute accuracy. The 105 mm saw blade projection makes these saws suitable for high-output requirements; the 150 m/min. cutting speed and the 80 m/min. pusher speed ensure flexibility.

***The production cycle speed is considerably increased by 25%, especially thanks to the brand new GIBEN SYNCRO-TECH.***
