**GMC**

MACCHINE PER LA LAVORAZIONE DEL LEGNO
WOODWORKING MACHINERY

Chi siamo

GMC SERVICE, fondata nel 1982 da tecnici specialisti con esperienza trentennale del settore, progetta e costruisce, a ciclo completo, macchine ed impianti per la lavorazione del legno.

GM MACHINERY affianca l'Azienda costruttrice con la propria esperienza nella progettazione d'impianti e fabbriche complete.

Introduction

GMC SERVICE, designs and manufactures machines and lines for the woodworking industry, since being established in 1982 by qualified engineers in this field with an experience of over 30 years.

GM MACHINERY is a partner of the manufacturer and offers their experience in the design and manufacture of individual machines through to complete factories.

La strategia

Risolvere le problematiche del cliente proponendo soluzioni razionali e concrete, fornire un'assistenza tecnologica fin dai primi contatti. Essere presenti con nostri esperti, per ottimizzare il rapporto, dalla prima proposta commerciale all'avvio dell'impianto finito.

The strategy

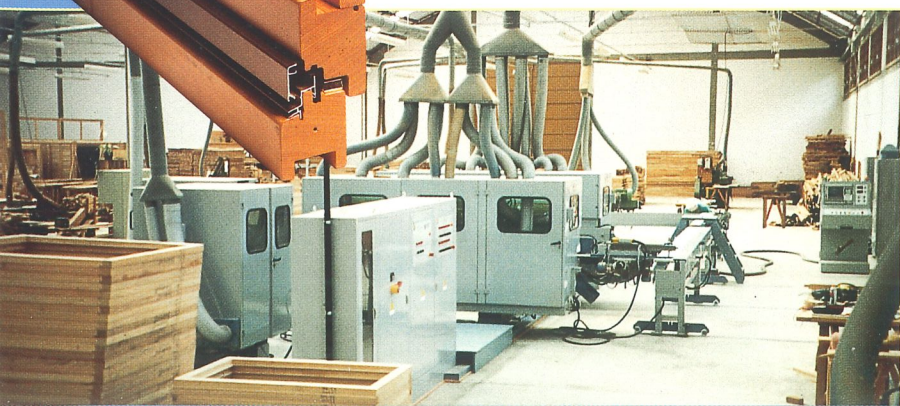

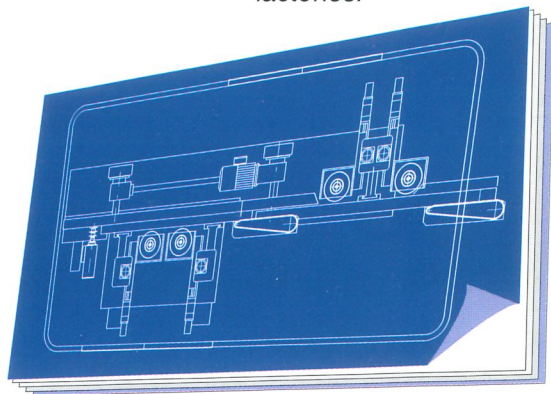

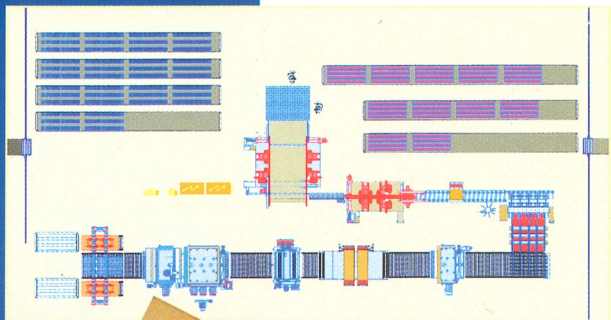

To solve the problems of the market proposing realistic and workable solutions, to provide the customer with technical assistance starting with the first consultation. GMC employs trained, experienced engineers and designers to produce initially the quotations, following with installation of machines.

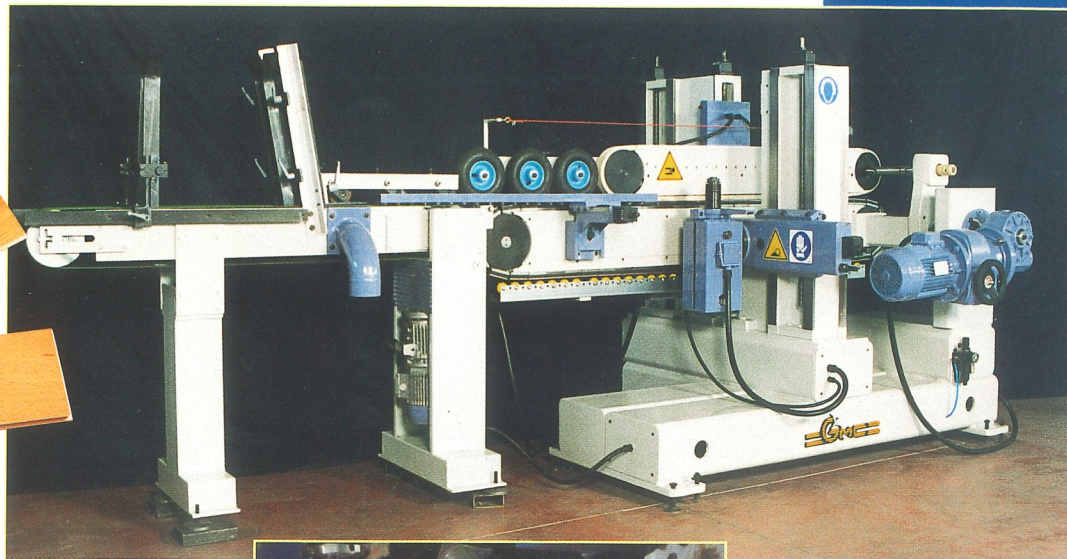

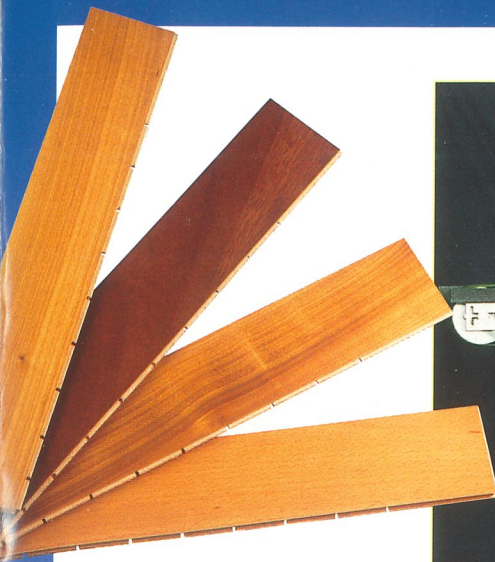

Service

Non a caso il sostantivo "SERVICE" fa parte del marchio: la nostra crescita e la nostra affermazione nei mercati interno ed internazionale dipendono essenzialmente dalla serietà e competenza dei nostri Tecnici d'Assistenza, che offrono un servizio completo all'utilizzatore, dando inizio ad un rapporto costruttivo e personale tipico di un'Azienda di dimensioni contenute.

Service

Purposely the word "SERVICE" is part of our logo, with our growth and achievement in the home and international market being due essentially to the reliability and skill of our service technicians who offer their complete service to the user, to ensure a constructive and personal relationship.

I prodotti

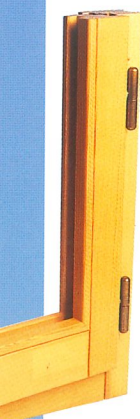

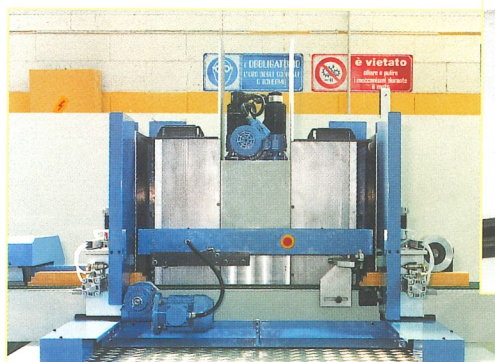

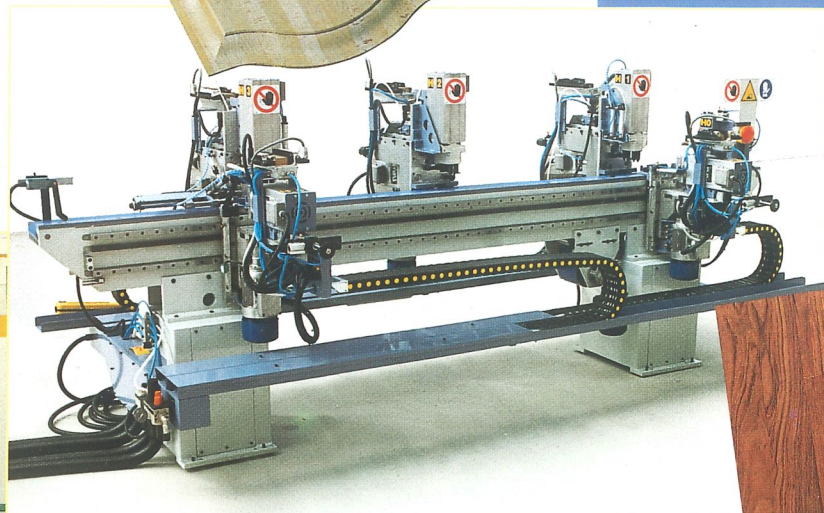

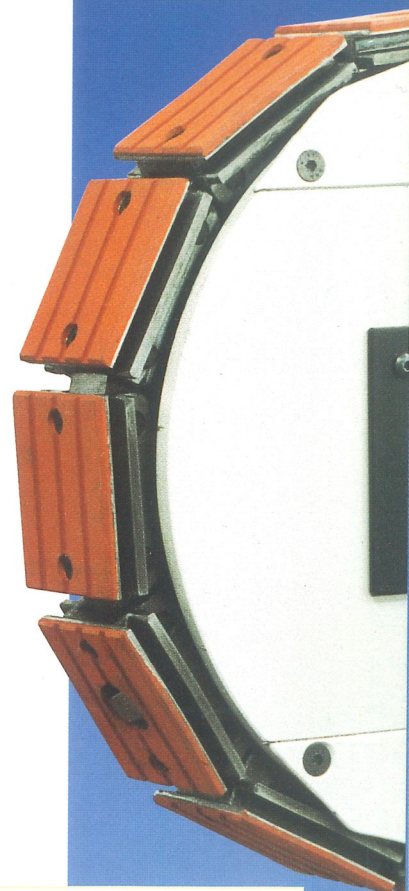

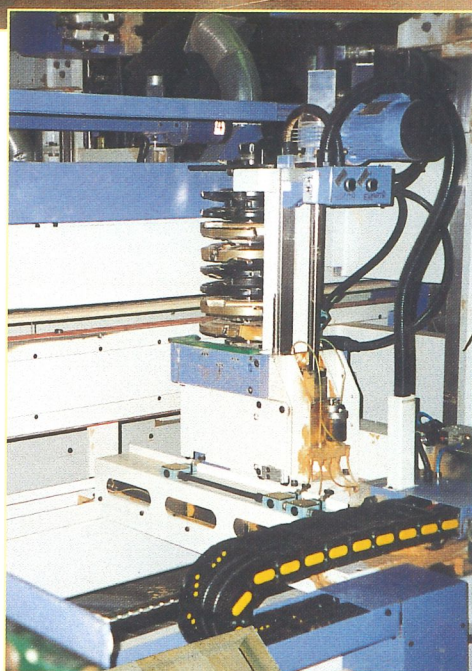

Le nostre realizzazioni si inseriscono nei settori più importanti dell'industria del legno, quali:

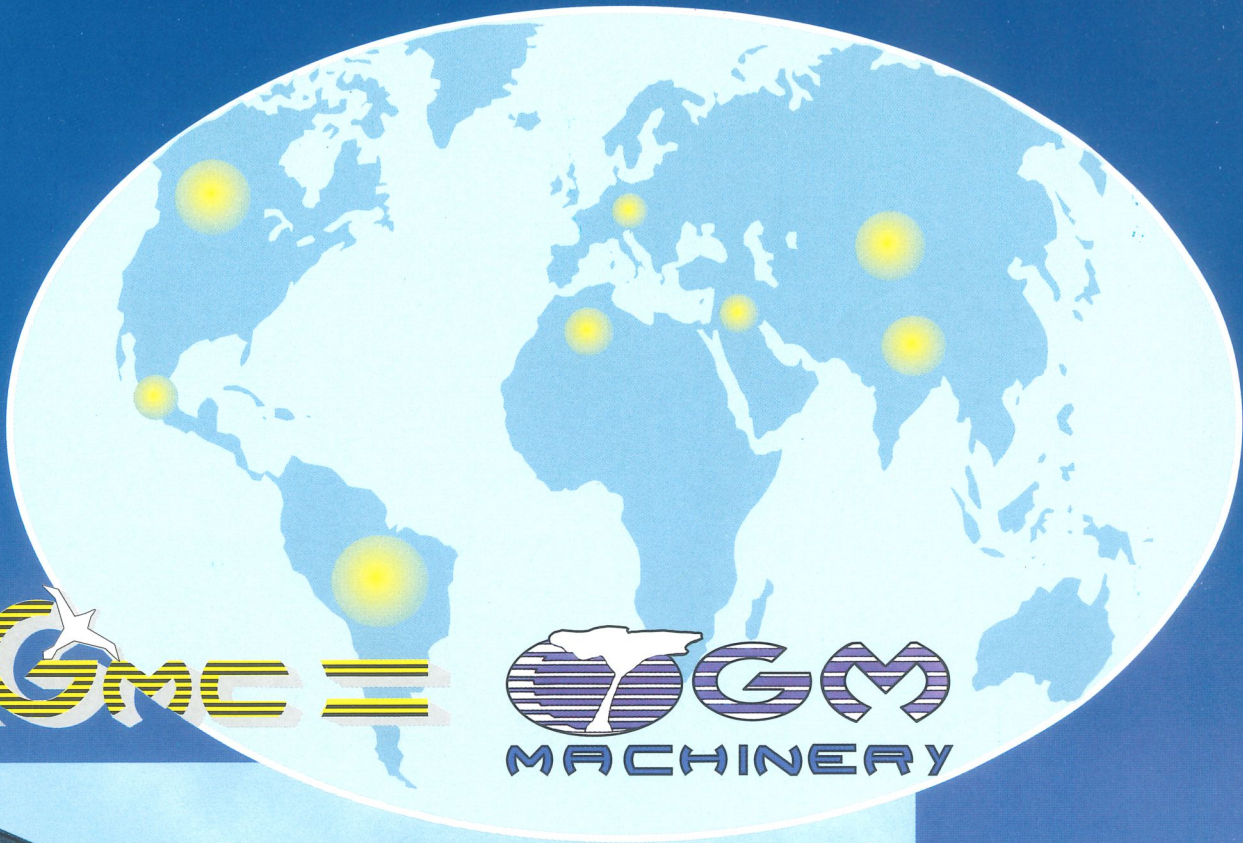

- **PANNELLI:** linee di squadratura per truciolato, laminato, compensati, materiali isolanti, ad elevato contenuto tecnologico.
- **MOBILI:** macchine e linee di produzione per antine sagomate, cassetti, telai, ad elevata automazione.
- **SERRAMENTI:** macchine, linee, centri di lavoro elettronici flessibili per porte, finestre, infissi.
- **PARQUET:** linee di fresatura ad alta produzione.
- **SEMILAVORATI:** macchine di preparazione Finger Jointing.

The products

Our success has gained us a reputation in the most important wood industry fields such as:

- **PANELS:** technically advanced squaring lines for the production of chipboard, laminates and laminated insulating materials etc.
- **FURNITURE:** machines and production lines with high automation for shaped doors, drawers, frames.
- **WINDOW AND DOOR FRAMES:** machines and complete lines, including electronic working centers for doors and windows, or door and window frames.
- **PARQUET:** highly accurate tongue and grooving lines for mass production.
- **SEMI-PROCESSED PRODUCTS:** semi-automatic line for Finger Jointing.
