## Universal Panel Saw OPTIMAT CH 03

- 1 User = Maximum output with minimum cost
  - Panel sizing
  - + solid wood cutting
  - + veneer stacks cutting
  - + cut to exact and precise measurements
  - + angular or miter cuts
- = "ALL-CUT"**

# "OPTIMAT CH 03" the ideal machine for your cutting needs

- As your new panel saw.
- As an expansion of your existing cutting solutions.
- As the substitute for an old panel saw.
- It offers all the technical advantages of a horizontal panel saw.
- Exact cut to size in one cutting cycle.
- Exact measurements, squareness and perfect quality cut.
- Maximum working safety with pressure beam, security shield and security bar.
- Optimal position of the vacuum openings.

The controller

The OPTIMAT CH 03 is equipped with an easy to use electronic controller. Individual or repetitive cuts as well as cutting pattern programming are very simple to execute due to the easy use of the work surface. The user can store up to 99 programs with 99 different

lines up to 99 repetitions each, with a maximum of 1.500 program lines. The user can connect a desktop PC to the controller of the machine via a serial cable and serial port at the controller (RS-232/RS-485), to send manually developed cutting patterns to the machine.

## The advantages

- Heavy duty table bed construction to ensure an optimum cutting quality.
- A program fence with bilateral rack and pinion to ensure the parallelity of the cut.
- High precision electro-magnetic measuring system.
- Maintenance free saw carriage guides.

- Side Alignment Device to square pieces from 100 mm to 1250 mm.
- Special main and scoring saw guides.
- Complies with CE Safety Regulations and dust and noise emission standards.
- Fast cutting cycles thanks to the automatic limitation of the saw carriage travel.
- Electronically adjustable saw carriage speed.

## Optional equipment:

A variety of options round-up the versatility of the OPTIMAT CH 03.

- Laser Light.
- Miter Fence.
- Grooving Device.
- Air Tables.
- Spraying Device (for plastics).
- Main Saw Blade Speed Regulator.
- Extraction Cylinders. (standard in the machines with a cutting width of 1.250 mm)

**The OPTIMAT CH 03 is the economical alternative for high quality panel sizing.**
