

This is the new model of the old and successful sanding machine for moulding R3, with a new design but keeping the quality of our products (RESINFER is a company certified by the International Quality System ISO 9002).

With this model you can sand the 3 sides of the mouldings at the same time, due the machine is provided with:

- Two sanding groups on the top, that go up & down and tilt in order you could sand pieces with different type of moulding.
- One sanding group in each side that can be put near or moved away from the moulding in order to get the suitable finish.

The above-mentioned motions are done from the electric control panel. This machine can be adjusted from the electric control panel in order we could work in two ways:

- With manual pressure
- With continuous and automatic pressure

The pieces pass over the machine on a dragging belt, which speed of working can be adjusted from 4 to 25 meters/minute.

We can sand pieces which wide was from 5 mm. to 160 mm. The maximum high of the pieces is 80 mm. this measures is taken having as reference one brush of diameter 200 mm.

The machine includes pressure wheels; adjusting these wheels we could sand small pieces.

Each sanding group is covered with dust-protections, in this way you could connect a dust extraction machine up and remove the sand.
