SANDINGMASTER

Series 3300

Precision sanding equipment for all finishing applications

Timesavers-Sandingmaster offers its widest selection of models within this group of dynamic woodworking machines. Used internationally, these machines are the industry's benchmark for value. That's because Timesavers-Sandingmaster builds the 3300 Series for long life and versatility, loads them with standard features others offer only as options - while delivering them at highly competitive prices.

By locating their motors under the machines, not on the outside, 3300s save space. All this, as well as compact design and European styling, make the 3300 Series first in its class and first among serious craftsmen.

The Timesavers-Sandingmaster family of wood sanding and finishing machines

A pioneer and leader in sanding technology for the woodworking industry, Timesavers-Sandingmaster produces a full range of wood-surfacing equipment, including:

- Widebelt finish sanders
- Finish planers
- Combination knife planer/sanders
- Veneer polishers and seal sanders
- Feed-through orbitals
- Rough lumber abrasive planers and knife planers

Our customers include a wide range of both small workshops and large multi-national companies. Whatever the size of your business, our experts stand ready to help you solve every wood-surfacing challenge you face.

Common elements:

Series 3300 specifications featured on all models

- Dial indicators on drum/platens
- Emergency brake system on all heads
- Centralized control panel
- Digital thickness readout
- 4-20 mpm feed speed A/C
- Hour meter
- Main motor Amp meters
- Auto set-up device
- Motorized lift
- 0-150mm opening (812-965mm passline)
- 760mm infeed loading area
- Four bed jacks
- Quick release outboard support
- Through beam abrasive belt tracking
- Infeed stop bar
- CE

Series 3300 - Sander

- Drums, platens or combination head types available
- One to three top head configurations available
- 280mm diameter drums (180mm diameter on combination heads)
- 75mm platen width
- Floating/rigid bed with air loaded shoes/rolls
- 1900mm abrasive belt length
- 430 – 500mm minimum part length (depending on head configuration)

Options

- Other voltages available
- Abrasive belt blowoff
- 1040mm constant passline
- Extended outfeed roller table
- Panel cleaning brush
- Air platen with timers and controls

Series 3300 - Planer/Sanders

- Planer head, drum, and combination head types standard
- Two or three top head configurations available
- 280mm diameter contact drums (180mm diameter on combination heads)
- 180mm diameter spiral planer head (in first position)
- 75mm platen width on combination head
- Spring-loaded holddown shoes/rolls
- 1900mm abrasive belt length
- Attachable planer head maintenance stand
- Sectional infeed shoe
- Knife head maintenance kit
- Anti-kickback fingers
- 430 – 500mm minimum part length (depending on head configuration)

Options

- Other voltages available
- 1040mm constant passline
- Extended outfeed roller table
- Panel cleaning brush

Series 3300 - Veneer Polisher

-
- Drums, segmented platen or combination drum/segmented platen head types standard
 - One to three top head configurations available
 - 280mm diameter contact drums (180mm on combination heads)
 - 75mm platen widths
 - 2620mm abrasive belt length
 - Panel cleaning brush
 - Color graphical interface (HMI)
 - Vacuum bed
 - 150mm minimum part length
 - Spring-loaded holddown rolls

Options

- Other voltages available
- Abrasive belt blowoff
- 1040mm constant passline
- Extended outfeed roller table

Built-in quality and value without compromise

Serious craftsmen throughout the world agree that Timesavers-Sandingmaster is the first name in specialty surfacing machines for wood.

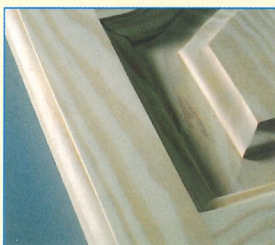

More than 50 years of research and testing, creative engineering and innovation is built into every machine we sell. This expertise and engineering assure our customers quality and value without compromise. And our worldwide network of trained distributors, as well as a factory-trained staff who supply service and parts, symbolize our commitment to excellence both before and after the sale.

With over 50,000 machines operating in six continents, Timesavers-Sandingmaster is the world's largest manufacturer and undisputed leader in wood surfacing equipment.

See how we can put Timesavers-Sandingmaster's expertise and engineering to work for you. Call us now.

*Superior wood finishing
on all your projects*

As you know, your reputation hinges on the consistent quality of your finished products. You can depend on your Timesavers-Sandingmaster machine to give you the outstanding results you've come to demand of yourself. Time after time!

*The Timesavers-Sandingmaster commitment
to excellence doesn't end with the sale.*

Service

With Service Technicians strategically located throughout the world, our service department is always ready to assist you. Whether it's the set-up of our new machines, or maintenance on one of over 50,000 Timesavers-Sandingmaster machines installed internationally, our technicians are trained for results.

For questions that don't require a technician, the Timesavers-Sandingmaster Service Department offers phone support through our call center. Our Service staff has unparalleled experience in the industry, with intimate knowledge of machines and applications.

The Timesavers-Sandingmaster Service Department will help you minimize downtime, and produce the best finish possible.

Parts

With over 50,000 machines installed throughout the world, our parts inventory needs to be extensive – and it is. The Timesavers-Sandingmaster Parts Department maintains over \$1 million in parts. Our parts professionals will assist you in identifying and ordering just the part you need, and process it with the urgency it deserves.
