

Flexipress *easypress*

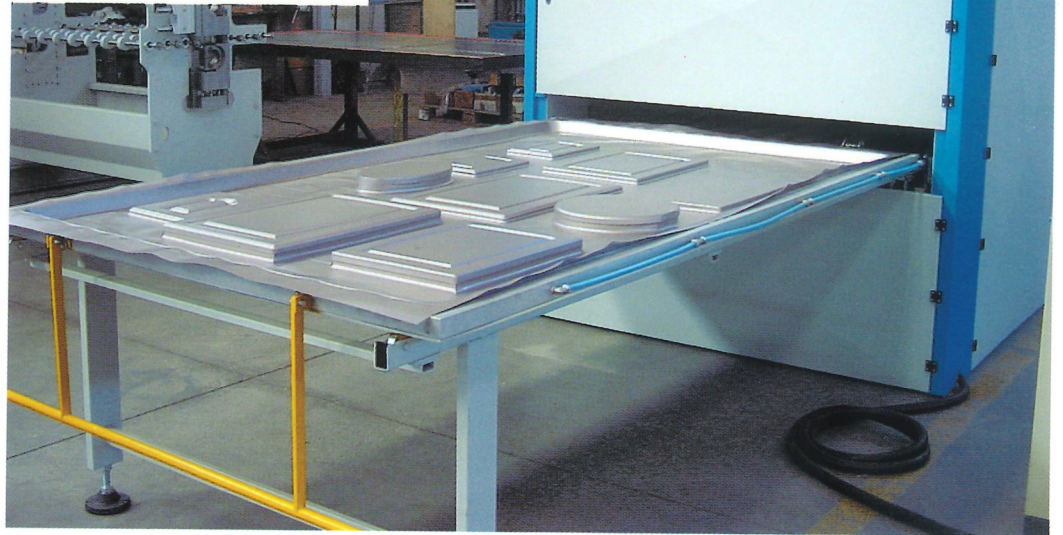

Il modello Easypress è destinato ad aziende con limitate esigenze produttive, tenendo in particolare considerazione il valore dell'investimento.

The model Easypress is a small press dedicated to companies with limited production needs. A particular attention has been given to capital investment. The press, easy to install and with a very limited maintenance, is easy to run.

Esempio di vassoio con materiale pressato. Diverse tipologie di pannelli possono essere pressate contemporaneamente.

Example of pressed material. Panels with different shapes can be pressed together in the same cycle.

Il modello Flexipress permette di raggiungere spinte fino a 4 kg/cmq, ottenendo pertanto una elevata definizione dei materiali da pressare.

The model Flexipress can reach a specific pressure of 4 kg/cmq, achieving a good definition of material to be pressed.

Il modello Flexipress viene fornito in versione standard con un vassoio. In opzione può essere fornito un secondo vassoio per aumentare la capacità produttiva della pressa.

The model Flexipress is supplied as standard version with one working table. As option, in order to increase the production capacity of the press, a second table can be supplied.

Esempi di pannelli con PVC.
Mediante l'utilizzo di un kit
membrana, la pressa
Flexipress può essere
utilizzata per nobilitazione
con impiallacciatura.

Examples of panels with
PVC coating. By adding
a membrane kit,
Flexipress can be used
to apply veneer.
