# T TAMPONE TRASVERSALE - CROSS BELT UNIT - QUERBAND

Sostituzione rapida lamina con feltro  
Quick substitution lamina with felt  
Schneller Wechsel der Gleit- und Schleifbeläge

Settori dotati di interconnessione multipla  
Sectors provided with multipla interconnection  
Verzahnte Glieder im Segmentschleifschuh

# 2 TAMPONE LEVIGATORE - SANDING PAD - SCHLEIFSCHUH

Sostituzione rapida lamina con feltro  
Quick substitution lamina with felt  
Schneller Wechsel der Gleit- und Schleifbeläge

Bloccaggio automatico  
Automatic Lock  
Schnellulschluss

# 1 RULLO LEVIGATORE SANDING ROLLER SCHLEIFWALZE

Piano flottante temporizzato per la levigatura di pannelli con spessori diversi  
Floating table for the sanding of panel with different thicknesses

Zeitgesteuertes "Pianetti-System" für den Ausgleich von Stärketoleranzen bei Roh- und Lackschliff

# 3 TAMPONE SUPERFINITORE SUPERFINISHING PAD SUPER-FINISH AGGREGAT

L'impiego di un nastro lamellare intermedio tra il nastro abrasivo ed il tampone garantisce un miglior grado di finitura ed una durata maggiore del nastro abrasivo.

The use of an intermediate chevron belt between the abrasive belt and the sectioned pad insures a longer abrasive belt life and the highest quality sanding.

Das innenlaufende Lamellenband erhöht die Bandstandzeiten und ermöglicht das Superfinish speziell bei UV und Pigment lackierten Teilen. Offenporige Holzarten werden besonders sauber bearbeitet.

**PIU' DI UN MOTIVO PER SCEGLIERE TAGLIABUE  
 MORE THAN ONE REASON TO CHOOSE TAGLIABUE  
 MEHR GRÜNDE SICH FÜR TAGLIABUE ZU ENTSCHEIDEN**

In ogni particolare delle nostre levigatrici viene evidenziato la chiara scelta aziendale di non raggiungere compromessi tra qualità e prezzo ma di offrire sempre ai nostri clienti la miglior tecnologia presente sul mercato  
 In each particular of our sanding machines is in evidence the clear firm choice to offer always to our customers the best technology on the market and not to come to a compromise between quality and price  
 Heute erreichen unsere Breitbandschleifmaschinen einzigartige Leistungen und garantieren über eine innovative Technologie ein Höchstmass in Preis und Leistung

Pannelli fono assorbenti  
 Deadening protection  
 Schallsisolierung

Soffiatori nastri abrasivi azionati da motoriduttori ad eccentrico  
 Sanding belt blowers controlled by motoreducers with eccentric  
 Über Getriebemotoren intermittierende Bandausblasungen

Strutture monoblocco in acciaio  
 Steel enblock  
 Massive Stahlschweisskonstruktion in Monoblockbauweise

C.N.C. a cristalli liquidi per l'inserimento a bordo macchina  
 CNC with liquid crystals for the insertion on the machine  
 CNC Steuerung mit TFT Display und thermoformierter Tastatur

Pianale trasportatore costituito da una sola struttura in acciaio rettificato e con spessore da 15 mm. a 25 mm.  
 Conveyor plane provided with a rectified steel structure with thickness from, 15 to 25 mm.  
 Transportkonstruktion in massiver Bauweise aus 15 und 25 mm Walzstahlelementen

Testa mobile di serie utilizzando grosse colonne di sollevamento  
 Standard moveable head using big lifting columns  
 Solide Spindelhubgetriebe für die Höheneinstellung

Motori nastri abrasivi collocati all'interno del basamento  
 Sanding belt motors placed inside the base  
 Geschlossene Stahlschweisskonstruktionen bis 30 mm Wandstärke

Tappeti trasportatori in gomma strutturati su 3 tele e sezionati in anelli per il centraggio costante sul banco.  
 Rubber conveyor belts structured in 3 cloths and sectionated in rings for the constant centering on the plane.  
 Vulkanisierte Vorschubteppiche mit 3 Gewebelagen von Markenlieferanten

Basamenti con lamiere di spessore fino a 30 mm.  
 Base with thickness sheet up to 30 mm.  
 Die Antriebsmotoren sind platzsparend in der Maschine montiert

## ACCESSORI OPTIONALS ZUBEHÖR

Soffiatori rotativi  
Rotating blowers  
Rotierende Flügelbläser

Rullo in tinex strutturatore  
Structurating roller  
Strukturierwalze

Rullo levigatore  
Sanding roller  
Schleifmittelbesatz

Spazzola antistatica  
Anti-static brush  
Reinigungsbürste

Rullo scotch brite  
Scotch brite roller  
Scotch - Brite Glättbürste

Spazzola tappeto trasportatore  
Motorized conveyor belt brushing device  
Transportband Reinigungsbürste

Depressore con cabina insonorizzata  
Vacuum device with sound proof cabin  
Schallisolierte Vakuumsaugung

## UNITÀ DI GOVERNO

- Gestione elettronica dei gruppi di lavoro.
- Attivazione soffiatori.
- Software sfinestrati.
- Software di produzione.
- Istogrammi.
- Posizionamento gruppi operativi.
- Collegamenti con PC.
- Memorizzazione programmi.
- Avviamento automatico nastri in sequenza.
- Recupero consumi nastri abrasivi.
- Incremento automatico della velocità nastri abrasivi.
- Autodiagnosi delle emergenze.

## ELECTRONIC CONTROL UNIT

- Electronic management of working units.
- Blowers timing.
- Software.
- Operating unit positioning.
- Histograms.
- Program storage.
- Connection with PC.
- Sanding belt automatic start up.
- Sanding belt wear recovery.
- Automatic increase of sanding belts speed.
- Emergencies autodiagnosis.

## STEUERUNG

- Elektronische Einstellung der Aggregate und gesamten Maschine.
- Einsatzsteuerungen.
- Software-Wartung.
- Geschwindigkeitsregulierungen.
- Programmspeicher.
- PC-Vernetzung.
- Automatik-Start.
- Schleifbandabnutzung.
- Fehlerdiagnostik.
- LCD-Farbbildschirm (Flüssigkristall).
- Indurtriétastatur.
