

Safety control (STOP):
Electronic temperature control.

Feed unit: feeding of the
workpiece to be edged.

Power trimming unit: trimming
both sides simultaneously.

End cutting of front and back of the tape.

For panel edgebanding with preglued PVC, melamine and veneer. Automatic edge feeding system. Trimming on both sides. Motorized top and bottom trimming unit. Front edge trimming, rear flush cutting of the tape. No compressed air or dust collector required. Powerful hot air system with electronic temperature control. Minimum heat up time (2min.). Belt feeder for automatic workpiece.

Specifications:

Input power: 3,000 W

Min. edging thickness: 11 mm

Max. edging thickness: 65 mm

Electronic temperature control: 0°-500°C

Work speed: 4.2 mts/min

Voltage (1-ph): 220 V

Dimensions: 1,720x950x1,350 mm

Weight: 117 Kgs
