

AIRPRESS DEVELOPEMENTS LTD

THE BENCH PRESS

The Bench Press is the latest quality product to come from AirPress Developments. It has been developed for the ease of use and to provide a cost effective solution for all industries involved with the forming and laminating wooden and thermoplastic materials.

It is the logical upgrade to the portable Air Press system – simply plug in your existing vacuum pump or select from a range of high quality pumps available from AirPress Developments.

BENEFITS

- Veneer and laminate all your flat and curved components
- Thermoplastic materials formed with ease
- Trouble free pressing with uniform pressure in excess of 9 tonnes per square metre or $\frac{3}{4}$ ton per square foot
- Shaped parts manufactured using one-piece formers only
- Accelerated curing with optional overhead Infra Red Heater
- One-man operation – fast times for loading and unloading
- Upgrade from the **AIR PRESS to the BENCH PRESS** using existing vacuum pump.

FEATURES

High Strength Silicone Rubber membrane (resistant to 230°C) for easy laminating and thermoforming materials.

NOTE: Membrane will not 'tuck under' laminates when pressing flat materials on shaped formers

Multiholed platen for fast evacuation of air with easy to clean tough plastic surface.

Lightweight and portable anodised aluminium materials used throughout

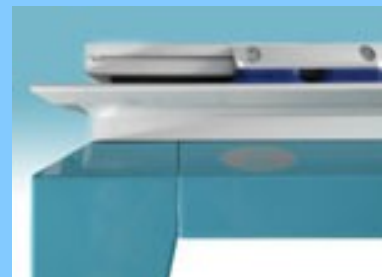

Aluminium frame hinges open to 45 degrees using gas springs for easy access to platen

Closes and seals in seconds using patented vacuum system.

PRICES:

PLATEN SIZES:

1200 x 900mm
1800 x 900mm
1400 x 1450mm
2200 x 1450mm
3000 x 1450mm
3600 x 1800mm
