## PUSH 100

Optimizer-Crosscut saw with pushing system, versatile, precise and cheap. Positioning by precision rack ensures maximum precision and maintenance of lifetime performance without any deterioration and no maintenance. Discharging table with lateral ejector.

Dedicated software allow you to make the most of your use in all areas:  
 Total table optimization for length with elimination of defects marked with fluorescent chalk.  
 Length optimization for working single boards with different widths (even with width detection), overlapping boards or beams for packers and carpenters.  
 Possibility to upload data via network or USB.

### Technical data

	<b>PUSH 100</b>
Blade diameter	450/550 mm
Blade motor	4/5,5 kw
Positioning speed	65 mt./1'
