

LBD

Edge Sanding Machine (double sided)

Features

- ▷ Modular base
- ▷ Frequency controlled drive
- ▷ Variable machine configuration
- ▷ Easy operation
- ▷ In-line or stand alone
- ▷ Optional CNC control

High Production Line

The double sided edge sanding machine type LBD allows for a flexible machine configuration. Multiple machining units can be mounted onto the modular machine base. Units include belt sanding, wheel sanding, contour sanding, shaping, foiling, coating, curing, etc.). Production speeds of 40 m/min are possible. All controls are incorporated in a central switch cabinet. An optional CNC version makes setting up the machine for different production runs easy.

Type	LBD
Working width	up to 200 to 3000 mm
Profile height	up to 90 mm
Transport speed	up to 40 m/min
