

HANDLES SHORT, LONG, WIDE & PRE-FINISHED STOCK

THE END PRO ADVANTAGES

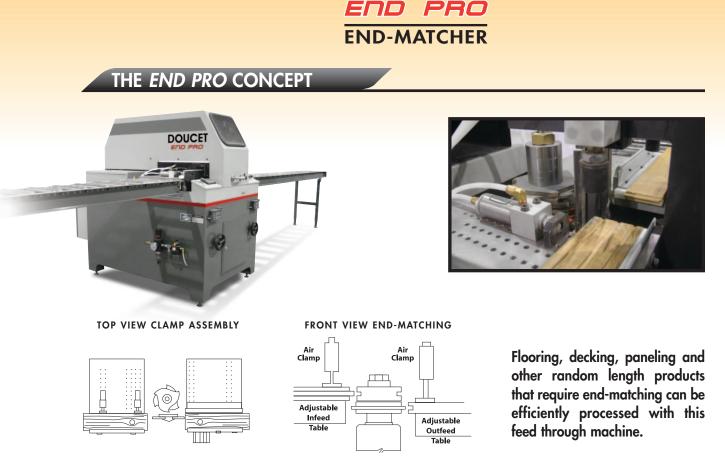

COMPACT DESIGN FAST SET UP LINEAR THROUGHFEED SYSTEM WIDE MODEL PRECISION PERFORMANCE EXPANDABLE

- Requires minimum floor area
- Allows short custom orders to be handled profitably
- → Allows material as short as 6" and up to any length to be processed
- Handles materials up to 12" wide
- Allows pre-finished flooring to be end-matched
- Into full finger jointing system at anytime to produce finger jointed flooring & other products

DOUCET PROCESS ENGINEERING

VALUE ADDED SOLUTIONS

FOR A COMPLEX WOOD INDUSTRY

End-matching is accomplished by stacking both the tongue and groove cutters on the spindle, and by setting the infeed table to the working height of the top cutter and the outfeed table to the height of the lower cutter. As the board enters the machine, the tongue is machined onto the leading end of the board. As the board exits, the groove is cut into the tail end. A simple, compact and efficient approach to end-matching random length materials.

END PRO SPECIFICATIONS			
MAX. WIDTH CAPACITY MIN. PIECE LENGTH TO PROCES	→ 8" (12" OPTIONAL) SS → 6"	SPINDLE MOTOR (RPM)	→ 7.5 hp • 220/3/60 3600 rpm
SPINDLE RPM/AC INVERTER	→ 3000 to 7000	SPINDLE TRAVEL SPEED	➔ Variable
SPINDLE TRAVEL SYSTEM	Mechanical Actuator	SPINDLE JOG TRAVEL SPEED	➔ Variable
SPINDLE DIAMETER	→ 1 ¹ /4"	SPINDLE LENGTH	→ 6"
MINIMUM CUTTING CIRCLE	→ 5 ¹ /4"	SPINDLE BRAKE	Automatic
MAXIMUM CUTTING CIRCLE	→ 7 1/2"	VERT. INFEED &	→ 3 1/2"
HOR. SQUARING CLAMPS	→ 3	OUTFEED TABLE ADJ.	
AIR CYLINDERS	→ 5	VERTICAL CLAMPS	➔ 1 per table
DUST OUTLETS	🔶 2 X 6" Diameter	AIR REQUIREMENTS	➔ 2 cfm at 100psi
WEIGHT	→ 900 lbs.	FLOOR AREA	→ 36"w X 45"d X 60"h
MAX. THICKNESS CAPACITY	→ 2"
