Veneer Glue Applicator | GLS

gluemaster

Veneer Glue Applicator | GLS

The GLUEMASTER GLS features smooth operation, low and easy maintenance and high throughput speed for the glue application to both sides of the veneer bundles in one pass

- Precisely adjustable glue quantity (PVAc or UREA type glue)
- Spot free and even glue application also on veneer bundles with fewer veneer sheets
- Overhead drive assembly avoid glue or condensed water to contaminate the bearings
- Integrated glue pot cooling allowing for extended glue lifetime
- Large diameter glue application rollers improve glue application
- Height sensing for exact veneer bundle alignment
- End-to-end, floating top pressure roller for optimal pressing of the veneer bundle
- Tool-free and simple disassembly of the dosing and glue applicator roller for hassle-free and fast cleaning

Pressure & guiding rollers

Horizontal and lateral guiding rollers retain the veneer bundle to avoid shifting of the veneer strips. Spot free and even glue application is the result.

Bundle height sensing

The bundle height sensing allows prepositioning of the horizontal pressure rollers to laterally align the bundle under light pressure before it is horizontally and laterally fixed.

Pressure discs

The veneer bundles are pressed uniformly by the pressure discs during glue application. This avoids glue penetration between the veneer strips.

Glue units

Lower and liftable glue units with overhead drive assemblies assure a hassle-free access to the glue units for cleaning and an almost maintenance free operation.

Cleaning

Tool-fee dismantling of the dosing and applicator roller secure fast cleaning.

Glue pots

Easy accessible glue pots and tool-free removal for cleaning.

Veneer transport

Smooth and maintenance free veneer transportation.
