

Heavy-Built Performance

SERVING THE FLOORING, WOODWORKING & MOULDING INDUSTRIES SINCE 1930

Are you ready for "heavy-built performance?" HASKO flooring, rough-mill and woodworking machinery incorporates robust engineering, state-of-the-art 21st Century technology and the industry's best service and support. Our goal is to ensure that our customers maintain a competitive advantage in a challenging global manufacturing environment.

HASKO has delivered hundreds of machines to customers who demand the ultimate in accuracy, efficiency, productivity and performance. When you buy from HASKO, there is no middleman — you deal directly with the manufacturer. Call us to see how our custom machine solutions and automation expertise can help your company improve yield, reduce labor, and improve efficiencies and output.

HASKO is a world-class manufacturer delivering Heavy-Built performance and innovative solutions.

We specialize in designing and manufacturing heavy-built machines for the following industries:

- Flooring: engineered wood, solid wood, and truck flooring
- Lumber ripping systems
- Moulding industry
- Dimensional wood/furniture
- Laminated beams
- General woodworking

Hasko SR SERIES

GANG RIP SAW

SR SERIES GANG RIP SAW

A Key Machine
in the Complete
Line of Wood
Manufacturing
Machinery by

HASKO offers complete solutions for your manufacturing needs for hardwood, softwood and engineered wood manufacturing needs.

- Rough mill optimizing gang rip systems
- HASKAN board scanning and HASKO automatic defect saw systems
- HASKO/Mekanika automated material handling solutions
- Flooring side matcher and feeders
- Defect scanning and cutting
- End matching systems for a variety of applications — engineered wood, solid wood, truck flooring and other applications
- Packaging solutions and automated handling

The HASKO model HSRF is available for high-speed board feeding and rip optimization. The HSRF feeder is standard with “Heavy-Built” drop-down chains, canted lower feed rolls, heavy-duty pinch roll unit and servo-controlled shifting board guide for precise, high-speed board positioning and optimization.

Energy-efficient electric drive provides reliable and consistent speed control and performance

Robust design and simplicity include “Quick Clear” function for raising feed rolls

FEATURES

State-of-the-art safety features include door interlocks and zero speed sensing safety circuitry
HASKO “Quick Clear” function provides fast and safe access for removing jammed wood
All feed drives and saw arbor are inverter controlled and included braking
All top feed rolls raise pneumatically and reposition to exact setup when closed
Top and bottom rolls are driven and inverter controlled for precise control
Can be adjusted to rip straight line or rip to guide
Saws are under the bed line

SPECIFICATIONS

Shortest Material: 27"
Thickness Material: 1/2" - 2 1/2"
Material Width: SR-24 up to 24" and SR-30 up to 30"
Arbor HP: Standard 75 hp (optional up to 150 hp)
Saw Diameter: 14"
Saw Sleeve Diameter: 3.5"
Feed Rolls: 8" diameter top and bottom
Feed Drive: Four 5 hp inverter controlled gear motors - 20 hp
Feed Speed: Standard 150 - 400 feet/min
Weight: 9,800 lbs
Floor Space: SR-24 68" x 79"

HASKO SR SERIES GANG RIPSAWS FOR:

Flooring Plants
Truck Flooring Plants
Lumber Processing Plants
Reman Lines
Moulding Blanks
Furniture Manufacturers
Box Plants
