LAM 1300

This is an automatic hydraulic sanding machine for turned components with 8 stations. As standard, the machine is fitted with 2 x hydraulic copiers for the flat belt sanding units and mechanically adjusted brush back sanding units for the profiled part of the turning. Movement of the copier units is via hydraulic cylinder. Components are loaded in the inclined feeding guides and automatically ejected at the back of the machine once the sanding cycle has been completed.

Equipment

Technical specifications

Max. sanding length	1300 mm
Max. sanding diam	200 mm
Head drive motor	4Kw
Hydraulic motor	2,2 Kw
Total power installed	7.2 Kw
Weight of the machine	1.900 kg
Dimensions	3500x1600x2100(h)
