

KUPER HFZ 4

Zig-Zag Veneer Hand Gluer

KUPER

KUPER HFZ 4 – Efficient and clean for zig-zag joining of small veneer quantities.

KUPER HFZ 4 Zig-Zag Veneer Hand Gluer

The practical unit for efficient and clean zig-zag joining of small veneer quantities. The KUPER Veneer Hand Gluer is ready after just approximately 5 minutes warm-up time. The KUPER glue thread is applied in the proven zig-zag method. The temperature regulator is continuously controlling the heat. The pressure used for guiding the hand gluer is sufficient for applying the glue thread on to the veneer sheet.

Technical data

Operating voltage standard	230 V alternating current (on request 120 V)
Net weight	1.9 kg
Capacity	40 W

Advantages at a glance

- easy handling
- clean application of the glue thread
- precise cutting of the glue thread
- low energy consumption
- additional release agent application
