

Used, but *excellent*: refurbished
machines from Kuper.

KUPER

Your competent partner for wood working machines.

The most important factor for precision and high quality – our team.

It goes without saying that we from Kuper only deliver machines which meet the strict quality standards which we have set ourselves. However, every machine can only be as good as the person who has worked on it. Therefore, refurbishing, repair and retrofitting of and amendments to used machines is exclusively carried out at Kuper by our team of experienced engineers

and specialists. People who know their job, who have **innovative ideas**, who can put technical feasibility into practice. Your competent partner for wood working machines.

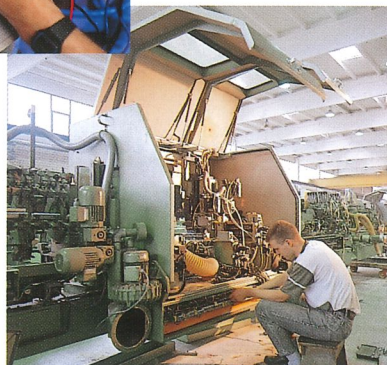

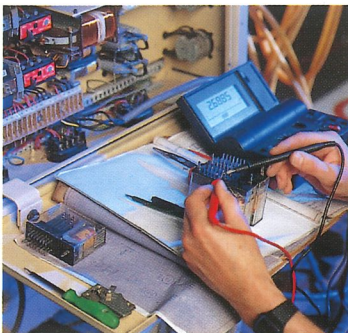

Top quality sells better. We keep you informed over our "specials" in our brochure "Latest refurbished machines" and in the Internet.

Installation, instructions, service – take profit of our services.

When you buy a refurbished machine from Kuper you have already made a substantial profit – but our service does not stop here. Upon request, we install your plant and our trained field fitters instruct your personnel in the machine operation. This allows you to put your production

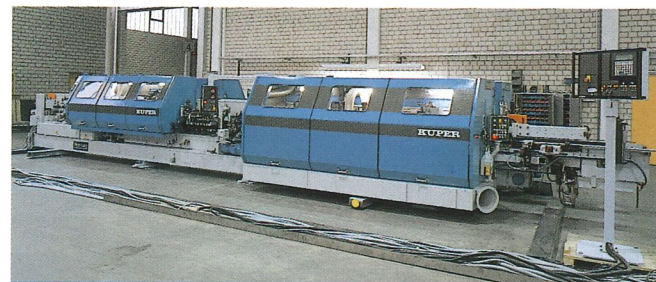

into full swing as soon as possible. Should you later encounter any technical problems, we provide you with the reliability of an internationally successful company. Our field force are readily available and quickly internationally on the spot.

The careful inspection of motors and units guarantees the high quality of all Kuper refurbished machines

The „new“ refurbished machines from Kuper –
technical perfection from professionals for professionals.

Our refurbished machines
are like new – *guaranteed!*

It does not make any difference if re-built on the inside or outside – Kuper refurbished machines do not shy away from the new ones.

Machines require an intensive customer advisory service. We take time for this.

We have more than 3,000 refurbished machines with continuously changing offers in stock. A treasure grove for economical purchasers. Of course, specialists from Kuper help you to choose from our extensive selection. They provide you with comprehensive information on all technical details, commercial efficiency,

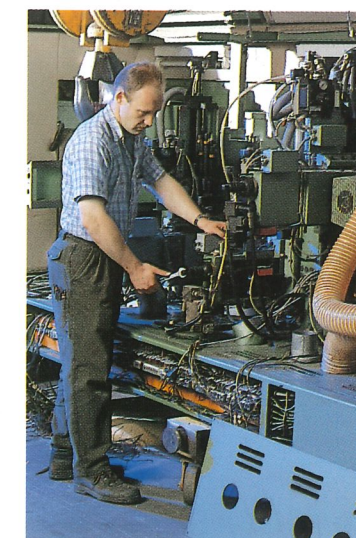

possibilities for combining new and refurbished machines, how to integrate your new acquisition in complete production lines and, last but not least, on **financing models** for your investment. At the same time, your individual wishes and ideas are always taken into consideration. Planning and advice – inclusive at Kuper.

We start with dismanteling...

We overhaul our second-hand machines as conscientiously as we construct our new machines. Therefore, we grant you the same guarantee for refurbished machines overhaul in our workshop as for the purchase of a new machine.

It is obvious why we are so sure of ourselves: virtually all machines are initially completely dismantled, wearing parts replaced with original spare parts and all units and plant components carefully inspected and repaired. Upon request we can, of course, also retrofit refurbished machines

with new units and electronic control systems to allow individual adaption to production capacity. Reliable **supply of spare parts** is guaranteed for many years to come. With our modern machine centers we are able to manufacture spare parts ourselves, if necessary.

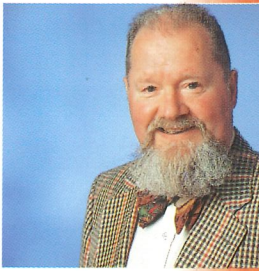

Qualified staff - from skilled workers to engineers – ensure that Kuper can grant you the same guarantee for refurbished machines as for new machines.

Your contact partners for individual planning and advice.

Metamorphosis of machines, made by Kuper...

Kuper guarantees highest quality standard.

The name Kuper stands for know how and experience in machine engineering.

Kuper not only sells machines, but has been manufacturing some of the top wood working machines of their kind for over 40 years (for example, the zigzag veneer splicing machines).

Our know how is reflected in all overhaul and repair work, inspiring you with confidence on purchasing refurbished machines from us.

We vouch with our

excellent reputation for every machine which leaves our halls, whether from our repair shop or from our machine factory.

A selection of manufacturers out of our wide range of refurbished machines:

Always more than 3,000 offers on over 25.000 m².

„Who can offer more?“ you could ask. The huge range in the Kuper refurbished machine market is unparalleled. From the small mecha-

nical machine to the latest design large-scale plants, we offer you attractive alternatives to improve your company's productivity and returns. Prior to any investments, make sure that you visit us.

Only one example out of our machine market: a Wemhöner Press.
