PROUDLY MADE IN ITALY

CSP6/L

Spraying machine

Two working stations. Easy cleaning

Anti-pollution, maximum protection of the working environment. It allows spraying, in automatic and in-line, of coating products on mouldings, pictures frames, valances, matchboards, and door and window elements. Structure made of metal sheet and steel tubular. Feed speed variable in continuous through inverter. The forward feed is made of a series of plastic rollers, solvent proof and non-stick. Booth for a complete protection of the working area, two stations. Easy to clean with excess product collection and recovery in a wide galvanized vat. Pneumatic control panel integrated with the machine.

- ✓ Moplen roller transport, suitable for short pieces up to 350 mm and 400 mm. wide
- ✓ Wide product recovery tank, on pull out cart
- ✓ Various product circuit configurations available up to 6 guns functioning contemporaneously
- ✓ High efficiency filtering cabinet thanks to a considerable filtering surface
