SPRAY & DRY – M

☰ **Spraying system without operator composed by one reciprocating arm.**

Minimum size, maximum productivity

- Flexibility, reliability, easy to use, combined with limited running costs and affordable investment. The ideal solution for replacing manual spraying or for finishing small series of production, with all kinds of paints and glues.

Only a supervisor to control spraying and managing coating is required.

Minimal floor space (aspirator and electric panel integrated on the machine), increased productivity, saving of paint, healthiness. Composed of a spraying oscillating unit and the automatic system Lift for loading/unloading the jigs from the trolleys.

- ✓ Suitable for small volumes and just-in-time production.
- ✓ Minimum size, to be placed inside a pressurized cabin.
- ✓ Automatic painting system on shuttle “jig covered with paper”
- ✓ Automatic handling from and to the trolley by the loader/unloader mod. LIFT
- ✓ Oscillating spraying head with 4 guns, quick release of guns
- ✓ 2-Its paint tank for small retouching
- ✓ Double filtering stage
