

SMALL

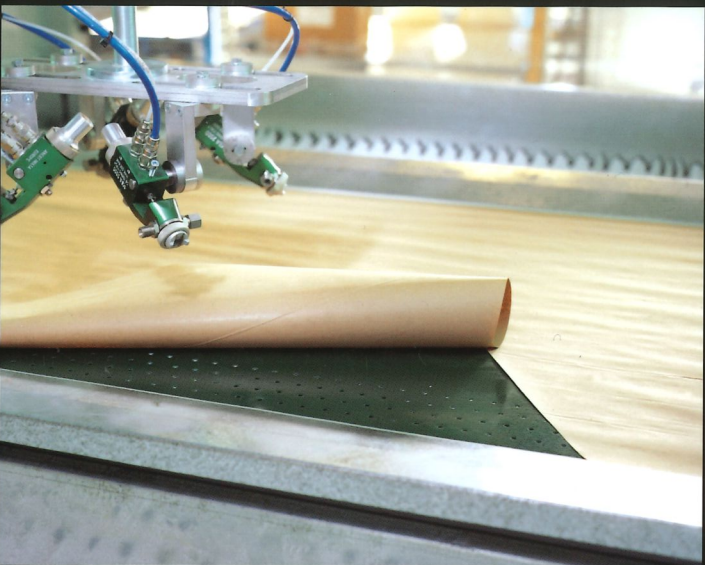

The SMALL automatic oscillating sprayer for panels with paper covered belt conveying system is the best solution on the market in terms of cost-efficiency, versatility and flexibility. The SMALL is the ideal answer in terms of first investment when switching over from manual to automatic spraying. This newly designed system represents the state of the art in terms of:

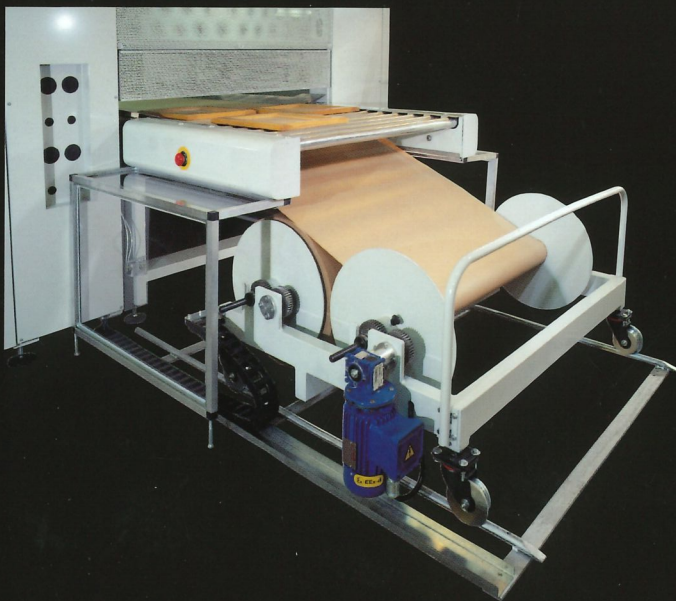

- High quality of application and excellent repetitivity
- Constant and even amounts applied to the piece
- Saves on paint
- High production rate
- Cleaning operations and times reduced to a minimum
- Fast colour change-over

The quick and easy replacement of the spray-guns holder makes the SMALL sprayer particularly suitable for spraying small batches of workpieces that require frequent changes of colour.

The conveying belt with holes, featured with a vacuum operated system, drives the self-winding disposal paper roll placed outside the spray area. This system assures an efficient cleaning and dramatically reduces daily maintenance requirements.

New trolley for paper control
The paper rolls are both mounted at the front of the sprayer, ensuring an easier changing over. They are also provided with transparent covers so that the operator can check them visually.
