

**Art. 2061**  
Automatic feed applicable on all types of planting and molding machine.

### Technical data

Max. working lenght unlimited	200	mm.
Working width	0-250	mm.
Feed speed	6-60	m/min.
Gradual	0,5	
Motor HP	4	atm
Compressed air		
Net weight	150	Kg.
Gross weight	200	Kg.
Measurements of case	1050 x 850 x 550	mm.

**Art. 2062**  
Automatic edge banders - Mod. "B/1"

**Art. 2063**  
Automatic edge banders - Mod. "B/2"

### Specifications automatic edge banders - Mod. "B/1" - "B/2"

The "B/1" - "B/2" are automatic edging machines with one side, realized to solve the problems of those firms which need to apply any kind of edges (ingot strips on rolls) even though they haven't production levels high enough to justify a big investment.

Among the fundamental prerogatives of these machines: the heated entrance guide for drying the humidity of the sides to be covered, the glueing set inclinable up to 15°, the trimming devices with vertical or horizontal "copying" records inclinable up to 30° to produce already perfectly removed sharp corners; the adjustable advancement speed; the thermostat with differential thermometer, the selector to use the machine also as simple trimming machine; the side supporting bar, adjustable for panels of various width dimensions. To apply PVC edges, load and automatic shear are available. The "B/2" is with special facing device which makes possible the perfect part off of front and back edge's limb also with a slanting cut.
