Press with electronic control and automatic panels loading/unloading

# sergiani gs-a

Press with electronic control and automatic panels loading/unloading

**High versatility** thanks to the cross or longitudinal panel loading and the available production line solutions to be configured according to customer requirements.

1

**Reliable and high-performance** loading/unloading system, thanks to the Mylar continuous movement system.

2

3

**Electronic control of all machine functions** via digital operator control panel with Siemens touch screen.
