## Automatic sanding and denibbing machine

Stability, precision, speed

The sanding – denibbing machine LS 7 is ideal to sand and denib profiles for doors, profiles with flap, linear profiles and furniture components. Extraordinary stability, great accessibility, maximum working precision, fast set-up, easy maintenance and possibility to apply a wide range of working units. Transport system with double chain to ensure matchless stability to the piece. Electrical controls along the machine. Emergency system activated by hand (forward and backward). Liquid crystal display operator panel.

- ✓ Specifically suitable for doors profiles
- ✓ Transport system with double chain from 22 mm each one
- ✓ Extremely sturdy, steel guides and ball pads
- ✓ High production speed
- ✓ Wide range of operating units, both milling and sanding
