

Are you pleased with a copy - or do you want the Best?

Morsø EH

- Noise level below 70db
- No dust
- Ideal for high production
- Faster than a double mitre saw
- Less waste of moulding than if using a double mitre saw

Morsø F

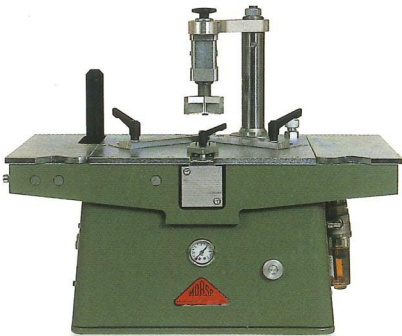

- Noiseless
- No dust
- Very clean and accurate cut in exactly 45 degrees (Adjustable to 90 degrees)
- 5 years' warranty

Do you value experience and know-how? Four generations (more than 85 years) of experience and know-how is not that easy to beat.

Do you want more information about **Morsø**, especially the blades? *Then please go on reading.*

DID YOU KNOW THAT:

- 1 **Morsø** blades last six times longer than all other blades available on the market.
That is Quality!!!
- 2 **Morsø** blades have a hardness of HR64
No other blade on the market is more than HR58.
- 3 **Morsø** blades are made from special made steel produced in Austria for the **Morsø** company only.
Therefore we must order the steel one year ahead.
- 4 **Morsø** blades ensure a superb smooth and clean cut.
This means no further preparation is required before joining the moulding.
- 5 **Morsø** blades are not only for wooden mouldings.
Morsø blades also cut plastic and MDF mouldings with the same superb result.
- 6 **Morsø** also produces blades for the JYDEN Mitring Machine.
*These blades are of course of the same high quality as the **Morsø** blades.*
- 7 You might save £ 30.00 when buying a cheaper set of copy blades. But please consider that you will have to buy 6 sets of copy blades for one set of original **Morsø** blades.
Then please tell us what is the cheaper!!
- 8 All original **Morsø** blades are stamped and tested before leaving our factory.
This eliminates the risk of receiving a set of poor blades.

Morsø UP-A

- Automatic pneumatic bench model
- Built-in support arms for long mouldings
- 3 pressure pads as standard - one for plain mouldings, one for mouldings with profile and one for mouldings with reversible profile. Also standard for the UP-M

Morsø UP-M

- Manual bench model
