Evolution

STEFANI

Evolution SSB

Il **pressore superiore** è costituito da un longherone in acciaio ampiamente dimensionato ed è dotato di sollevamento ad asse controllato.

The **top pressure beam** consists of a full-size steel beam equipped with NC managed positioning.

El **prensor superior** está formado por un larguero de acero de gran tamaño y cuenta con un sistema de levantamiento con eje controlado.

Squadrabordatrice elettronica
NC squaring-edgebander
Escuadradora-chapeadora electrónica

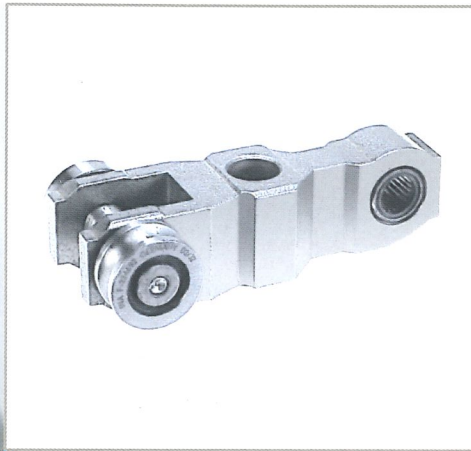

L'apertura del **montante mobile** è realizzata in modo rigido con una trasmissione che agisce su una vite senza fine ad alta precisione. Ciò permette di mantenere un perfetto parallelismo costante nel tempo.

The **movable beam** opening is rigid with a transmission that acts on a high precision worm screw, thus permitting a long term perfect constant parallelism.

La abertura del **montante móvil** se lleva a cabo en modo rígido con una transmisión que actúa sobre un tornillo sin fin de alta precisión. Eso permite mantener un paralelismo perfecto y constante en el tiempo.

Evolution SB

Il **cingolo** scorre su guida tonda e piana mediante cuscinetti lubrificati che consentono di ridurre al minimo l'attrito e di ottenere un'elevata precisione e rettilinearità di avanzamento.

The **track** runs on round and flat guides by means of lubricated bearings which reduce friction to a minimum and permit high feed precision.

La **cadena** se desliza sobre una guía redonda y plana mediante cojinetes lubricados que permiten reducir al mínimo la fricción y obtener una elevada precisión y avance rectilíneo.

Squadrabordatrice elettronica
NC squaring-edgebänder
Escuadradora-chapeadora electrónica

I gruppi di lavoro sono posti su **sopratavole** con la possibilità di spostamenti su guide lineari a ricircolo di sfere.

Sub-bases on every working unit with possibility of movements on caged ball linear guides.

Los grupos de trabajo están instalados en **sobremesas** con la posibilidad de desplazamiento sobre guías lineares con recirculo de bolas.

Evolution Flex

La squadraboardatrice **Evolution Flex** è in grado di fornire prestazioni diversificate in tempi rapidi, per permettere la lavorazione in serie di piccoli lotti, con un'efficienza adeguata a garantire al cliente al cliente tempi brevi di consegna.

The squaring-edgebander **Evolution Flex** can provide different kinds of performance in a short time: this is to allow the serial processing of small batches with a short delivery time.

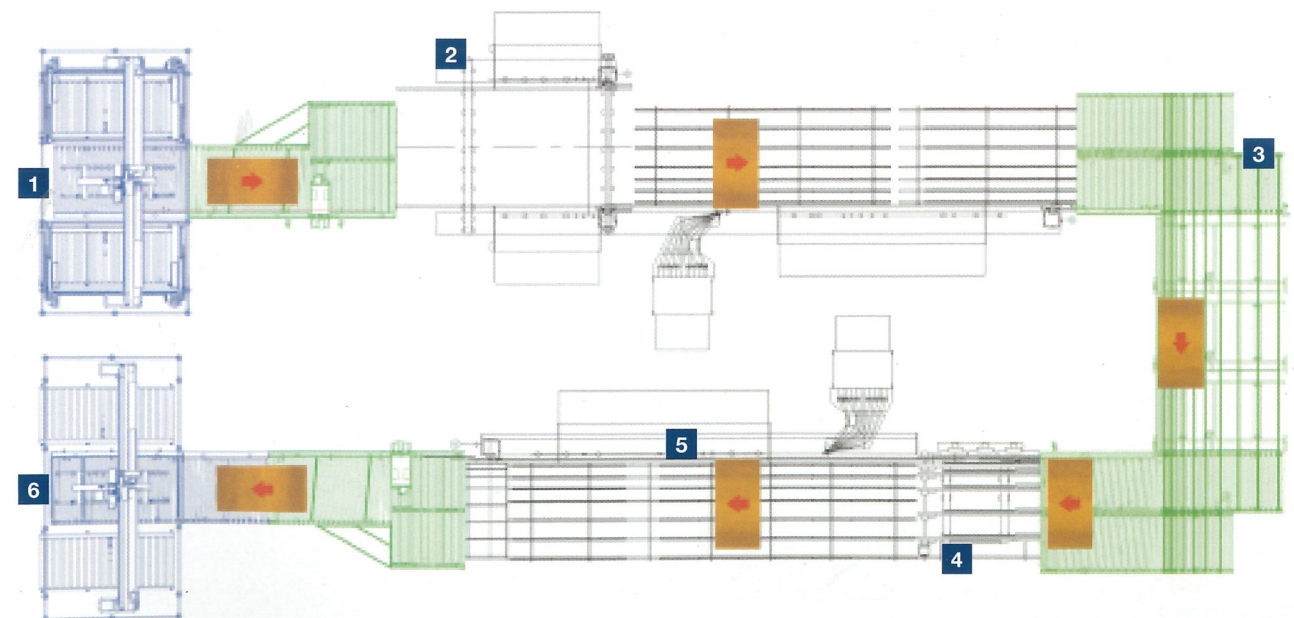

La escuadra chapeadora **Evolution Flex** está en condición de garantizar prestaciones distintas en tiempos rapidos, para permitir el trabajo en serie de pequeños lotes, con una eficiencia adecuada a garantizar al cliente tiempos breves de entrega.

Evolution 60

Evolution 60: larghezza minima del pannello 60 mm.

Evolution 60 è una macchina dedicata alla produzione di pezzi stretti: è la risposta ai clienti che richiedono alte prestazioni unite a dimensioni particolari dei pannelli.

Evolution 60: minimum panel width 60 mm.

Evolution 60 is a machine designed to produce narrow workpieces. It is designed to meet the demands of customers requiring high performance and special panel sizes.

Evolution 60: ancho mínimo del tablero 60 mm.

Evolution 60 es una máquina dedicada a la producción de piezas estrechas: es la respuesta a la demanda de aquellos clientes que requieren altas prestaciones y dimensiones especiales de los tableros.

PC Office

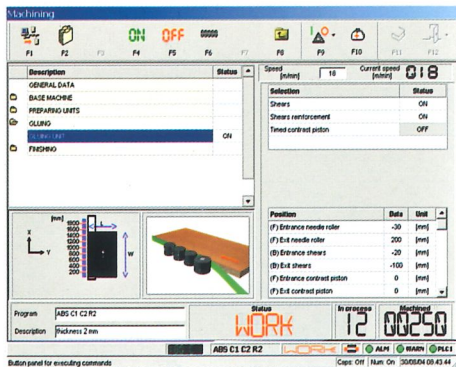

PC Office

PC Office

Le squadratrici Evolution sono dotate di **PC Office** che opera in ambiente Windows XP e consente di gestire la macchina in modo semplice, rapido e senza errori.

Evolution squaring-edgebanders are equipped with **PC Office** working in Windows XP, which allows easy, quick and precise machine management.

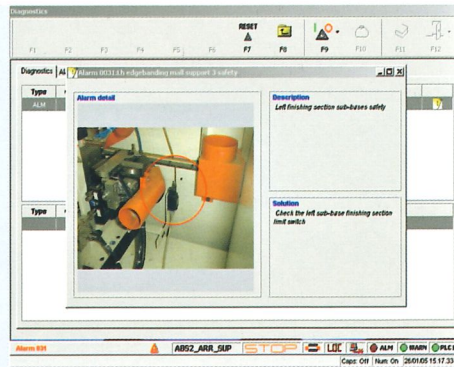

Las escuadradoras-chapeadoras Evolution están provistas de **PC Office** que trabaja en ambiente Windows XP y permite dirigir la máquina de manera simple, rápida y sin errores.

Numero illimitato di programmi di lavoro memorizzabili.
Selezione del primo o secondo passaggio senza cambio programma.

Unlimited number of processing programmes. Selection of the first or second pass without changing the program.

Número ilimitado de programas de trabajo memorizables. Selección de la primera y segunda pasada sin cambio de programa.

Gestione della diagnostica

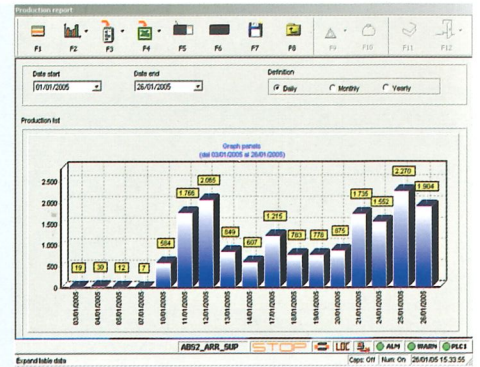

Nel caso di stato macchina in allarme, il PC segnala i dettagli dell'allarme e visualizza la zona della macchina nella quale l'allarme si è verificato, guidando, così, il cliente alla risoluzione del guasto.

Trouble shooting

In case of machine in warning, the PC visualizes the alarm, identifies the reasons of alarm and finds out where the alarm is on the machine. Therefore the PC leads the customer to the solution of the warning.

Gestión de los diagnósticos de errores

Si la máquina se para por una alarma, el PC señala los detalles de las alarmas y visualiza la zona de la máquina en la que hay la alarma, conduciendo, así, al cliente hasta la resolución de la falla.

Report di produzione

Programmi di lavorazione, pannelli lavorati, bordo utilizzato, con definizione giornaliera, mensile e annuale. I report di produzione permettono di tenere sotto controllo l'andamento della produzione, in modo statistico con grafici o con semplici fogli Excel.

Production reports

Processing data, worked panels, used edge, daily, monthly and yearly. Reports allow production monitoring by statistic graphics and Excel files.

Report de producción

Programas de trabajo, tableros trabajados, canto empleado, con definición cotidiana, mensual y anual. Los reportes de producción permiten controlar el desarrollo de la producción, de manera estadística con gráficos o con hojas de Excel sencillas.

Asistencia STEFANI

Con il servizio di teleassistenza viene assicurato al cliente un immediato intervento da parte dei tecnici STEFANI nelle situazioni di allarmi o errori durante il funzionamento della macchina. Alla richiesta di intervento da parte del cliente, i tecnici STEFANI si collegano via modem al PC della macchina situata nello stabilimento cliente e, in tempo reale, effettuano operazioni sul software per riportare la macchina in condizioni ottimali. Tramite teleassistenza, inoltre, è possibile realizzare modifiche o aggiornamenti dei programmi su richiesta dal cliente.

Through teleservice is assured to the customer an immediate intervention from STEFANI technicians in situation of warnings during the machine process. Further to the request of intervention about the customer, STEFANI technicians will connect by modem to the PC situated on the customer machine and, in real time, they will resolve the software problems and re-set the machine in the best conditions. Besides, through teleservice it's possible to modify or update the programs according to customer requests.

Con el servicio de teleasistencia se asegura al cliente una inmediata intervención por parte de los técnicos STEFANI en las situaciones de alarmas o errores durante el funcionamiento de la máquina. Con el pedido de intervención por el cliente, los técnicos STEFANI se conectan via modem al PC de la máquina situada en la fábrica del cliente y, en tiempo real, efectúan operaciones sobre el software para volver la máquina a las condiciones óptimas. Por medio de teleasistencia, además, es posible realizar modificaciones o reajuste de los programas sobre pedido por el cliente.

Applicazione
bordi in alluminio

Aluminium
edge processing

Aplicación
de canto de aluminio

La tecnologia sviluppata da Stefani per l'applicazione e la lavorazione di bordi in alluminio non richiede levigatori e consente di ottenere una finitura sia lucida che opaca.

The technology developed by Stefani for aluminium edge processing doesn't require sanding units and allows you to obtain both shining and opaque finishing.

La tecnología desarrollada por Stefani para la aplicación y el trabajo de cantos de aluminio no pide alisadores y permite obtener un retoque tanto brillo como mate.

Dati tecnici

Technical specifications

Características técnicas

Spessore minimo e massimo del bordo in rotolo	Minimum and maximum coil material thickness	Espesor mínimo y máximo del canto en rollos	0,3 - 3 mm
Spessore minimo e massimo del bordo in striscia (in funzione del gruppo incollaggio installato)	Minimum and maximum strip material thickness (in function of the fitted gluing unit)	Espesor mínimo y máximo del canto en tiras (segun el grupo encolado instalado)	0,3 - 12 mm (25 mm opt.)
Spessore minimo e massimo del pannello	Minimum and maximum panel thickness	Espesor mínimo y máximo del panel	10 - 60 mm
Larghezza minima del pannello (in funzione dei gruppi operatori montati)	Minimum panel width (in function of the fitted working units)	Ancho mínimo del panel (en función de los grupos operadores instalados)	215 mm
Larghezza massima del pannello (prima di linea)	Maximum panel width (first in line)	Anchura máxima del panel (primera en linea)	1600 mm
Larghezza massima del pannello (seconda di linea)	Maximum panel width (second in line)	Anchura máxima del panel (segunda en linea)	3200 mm
Interasse pioli	Dogs distance	Distancia fiadores	900 mm (opt. 500/400 mm Evolution SSB) 500 mm (opt. 400/300 mm Evolution SB)
Altezze pioli	Dogs height	Alturas fiadores	12-18-25 mm
Velocità di avanzamento variabile	Adjustable feed speed	Velocidad de avance variable	10-40 m/min (opt. 10-60 m/min Evolution SB) (opt. 10-70 m/min Evolution SB)
