## MACHINEBOUW

*Pioneer* in the parquet industry

- cross - cutting
- cutting out defects
- end - matching

*High  
capacity*

# POWERMAX

PATENT GRANTED

# POWERMAX

## END-MATCHING MACHINE

- The latest development in wooden floor machinery.
- High capacity because of advanced servo technique.
- Machine for end-matching and cross-cutting variable lengths and fixlengths.
- Exceptional in the branche because of its unique combination of production methods.

### Functional Specifications

Lengths	500 - 6000 mm
Widths	50 - 300 mm
Thicknesses	8 - 30 mm
Capacity	up to 24 pc/min

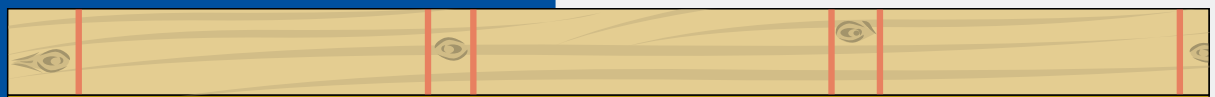

Random lengths, Fixlengths,  
Optimizing at 10cm-lengths

### Technical Specifications

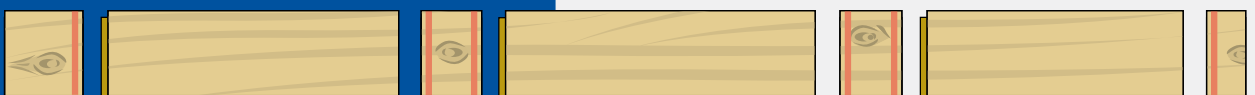

Weight	3000 kg
Power	40 kW
Pressure	6 bar
Dim. LxHxW	2240x2000x1520 mm
Cutter diameter	125 mm
Sawblade diameter	450 mm
Dust connection diameter	200 mm

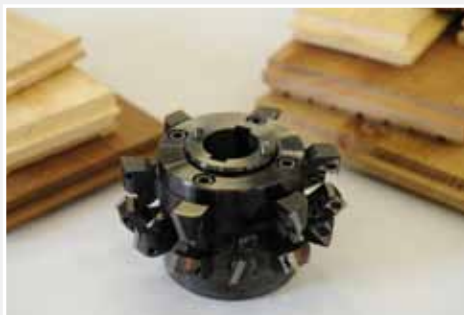

Board before operation (defects marked)

Board after operation

In the machine boards are positioned very accurate, cut and endmatched.
