## Nested Based Router Vantech Series

## Vantech Series

$$
15 \mathrm{y}
$$

## "The confidence you place in us

 is an obligation we take seriously"Our machines are built to last. This is
guaranteed by the overall quality of WEEKE -
delivering excellence for a machine's lifetime. $\qquad$

## Vantech Series - Standard Features

- 12 HP ( 9 kW ) HSK-routing spindle

- Secure and fast feeding of the tool changer magazine

- Secure and quick fitting into the routing spindle

4

- Very flexible table system

## Optional extras

- 7 vertical drilling spindles
- Not in combination with the additional tool changing system

## Voltage transformer

- Transformer for 210/220/230 voltage available
- Prewired for 460/480 voltage

Extention stop system

- 4 pneumatically lowerable Aluminium stop cylinders

Notes:

- "Quik Pod
$168 \times 78 \times 41$ mm
■ "Quik Pod
$198 \times 168 \times 41 \mathrm{~mm}$

- Patented system to ensure correct drilling depth
- 

Air-conditioning

- Air-conditioned cabinet

High volume vacuum pump

- More volume - more power

- Not in combination with the vertical drilling aggregate

Expandable tool changing system

- 7 additional tool changing

## Included software bundle

- woodWOP
- MCC
-3D CNC-Simulator
- woodWOP DXF Basic
- MDE Basic

- Entry nesting software simple \& easy
- woodWOP-programs (individual parts) can be directly nested manually (drag and drop)

- Interface for CAD-Data Import
- Basis to generate woodWOP programs

- Simulates the processing in the order it is stored in the NC-program
- Allows time calculation
- Collision check of the vacuum cups

- Modern software based on Windows ${ }^{\oplus}$
- More than 15.000 installations worldwide
for the machine
for the office PC

woodWOP

Tool Selection
woodWOP is a CNC programming system that has been specially designed for the machines of the HOMAG Group. woodWOP is a Workshop-Oriented Programming system (WOP). Rather than programming the machine directly, the workpiece and its machining steps are described. This makes programming considerably easier and programs remain versatile. woodWOP offers high levels of convenience by using familiar Windows applications such as cutting, copying and pasting machining steps, and zooming. It is possible to very quickly and easily generate the contour of the workpiece using numerous drawing functions. Furthermore, each machining step has its own macros. This means that routing, drilling or sawing, for example, can be programmed quickly and easily by entering the machining parameters. Variant programs can be easily generated by using variables in woodWOP.

## Highlights

- Graphic tool selection
- Automatic suction cup recommendation
- Automatic generation of machining steps for edge gluing
- File Preview and MPR Browser (optional)
- Context-sensitive online help
- Interfaces: DXF, MPR, PRJ (optional)
- Extensive program library with sample programs for contours, cabinet furniture, countertops and doors
- On the Internet:
www.woodWOP-Forum.de
$\rightarrow$ Help, information and discussion by woodWOP users for woodWOP users
- Global sales of more than 15,000 machines with woodWOP
