SANDINGMASTER

Series 2300

Precision sanding equipment for all finishing applications

Optimally suited for small to mid-sized cabinet, millwork and furniture plants, Series 2300 machines feature standard components other manufacturers offer only as options. Having one to three heads with sanding heads, planer heads or orbitals, these powerhouses deliver and last. The combination head is situated in the last position for versatility. And the 1900 mm long abrasive belt is made for long life.

Angled control panels are easy to use and dial indicators on heads make setup simple. Moreover, our through-beam electronic abrasive belt tracking reduces belt mistrack problems. And the compact frame designs ensure streamlined usage and a smaller footprint.

The Timesavers-Sandingmaster family of wood sanding and finishing machines

A pioneer and leader in sanding technology for the woodworking industry, Timesavers-Sandingmaster produces a full range of wood-surfacing equipment, including:

- Widebelt finish sanders
- Finish planers
- Combination knife planer/sanders
- Veneer polishers and seal sanders
- Feed-through orbitals
- Rough lumber abrasive planers and knife planers

Our customers include a wide range of both small workshops and large multi-national companies. Whatever the size of your business, our experts stand ready to help you solve every wood-surfacing challenge you face.

Common elements:

Series 2300 specifications featured on all models

- Centralized control panel
- Digital thickness readout
- Double infeed & outfeed hold down rolls
- Hour meter
- Main motor Amp/Watt meters
- Four bed jacks
- Infeed stop bar
- CE

Series 2300 - Sander

- Drums or combination head types available
- Two or three top-head configurations available
- Dial indicators on drum/platens
- 200 mm drum (140 mm on combination heads)
- 63 mm wide platen on combination head
- One spare platen
- 1900 mm abrasive belt length
- Disc brakes on main motor
- 6-14 mpm feed speed A/C
- Auto set-up device
- Motorized lift
- 0-125 mm opening (835-965 mm passline)
- 355 mm infeed loading area
- Quick release outboard support
- Through beam abrasive belt tracking
- 380 mm minimum part length

Options

- Other voltages available
- Veneer-Saver air platen with timers

Series 2300 - Planer/Sanders

- Planer and combination head types standard
- Two top-head configurations available
- 152 mm diameter on spiral planer head (in first position)
- 140 mm diameter drum on combination heads
- Dial indicators on drum/platens
- 63 mm platen width on combination head
- One spare platen
- 1900 mm abrasive belt length
- Disc brakes on main motor
- Sectional infeed shoe
- 6-14 mpm feed speed A/C
- Auto set-up device
- Motorized lift
- 0-125 mm opening (835-965 mm passline)
- 355 mm infeed loading area
- Quick release outboard support
- Knife head maintenance kit
- Anti-kickback fingers
- Through beam abrasive belt tracking
- 380 mm minimum part length

Option

- Other voltages available

Series 2300 - Orbital Sanders

- Twin pad orbital with oscillation and brush head types standard
- Two top-head widths available
- 254 mm brush diameter
- Two platens @ 127 mm wide each
- Two spare platens
- 900-1100 mm abrasive belt lengths
- 1.5-4.5 mpm feed speed A/C
- 0-152 mm opening (835-965 mm passline)
- 610 mm infeed loading area
- 610 mm minimum part length

Options

- Other voltages available
- Vacuum bed (holds 152 mm X 152 mm parts)

Please note that the Orbital machines are not available from Timesavers in Italy, Germany, UK or Spain.

Built-in quality and value without compromise

Serious craftsmen throughout the world agree that Timesavers-Sandingmaster is the first name in specialty surfacing machines for wood.

More than 50 years of research and testing, creative engineering and innovation is built into every machine we sell. This expertise and engineering assure our customers quality and value without compromise. And our worldwide network of trained distributors, as well as a factory-trained staff who supply service and parts, symbolize our commitment to excellence both before and after the sale.

Series 2300 - Planer/Sanders

With over 50,000 machines operating in six continents, Timesavers-Sandingmaster is the world's largest manufacturer and undisputed leader in wood surfacing equipment.

See how we can put Timesavers-Sandingmaster's expertise and engineering to work for you.

Call us now.

*Superior wood finishing
on all your projects*

As you know, your reputation hinges on the consistent quality of your finished products. You can depend on your Timesavers-Sandingmaster machine to give you the outstanding results you've come to demand of yourself. Time after time!

*The Timesavers-Sandingmaster commitment
to excellence doesn't end with the sale.*

Service

With Service Technicians strategically located throughout the world, our service department is always ready to assist you. Whether it's the set-up of our new machines, or maintenance on one of over 50,000 Timesavers-Sandingmaster machines installed internationally, our technicians are trained for results.

For questions that don't require a technician, the Timesavers-Sandingmaster Service Department offers phone support through our call center. Our Service staff has unparalleled experience in the industry, with intimate knowledge of machines and applications.

The Timesavers-Sandingmaster Service Department will help you minimize downtime, and produce the best finish possible.

Parts

With over 50,000 machines installed throughout the world, our parts inventory needs to be extensive – and it is. The Timesavers-Sandingmaster Parts Department maintains over \$1 million in parts. Our parts professionals will assist you in identifying and ordering just the part you need, and process it with the urgency it deserves.
