The motors powers in this catalogue are expressed in S6, except where otherwise specified.  
In this catalogue, machines are shown in CE configuration and with options.  
We reserve the right to modify technical specifications without prior notice, provided that such modifications do not affect safety as per CE norms.

N.1 additional tool-holder spindle - 40 mm diameter		-	0
N.1 additional tool-holder spindle - 50 mm diameter		-	0

# tenoning machine machining units

**High efficiency**  
Carriage movement on ball bushing linear guides and positioning by means of 5-position revolver.

**Simple adjustment**  
Revolver with 5 mechanical stops for the tenon depth set-up on the circular saw unit.

**Perfect tenoning operations**  
Revolver with 4 mechanical stops for the work-piece positioning during tenoning machining, without needing cutting-off operation.

**Accurate positioning**  
The worktable is fitted with a tiltable fence up to  $\pm 45^\circ$ .

**Easy set-up**  
Spindle moulder unit with fixed spindle with height adjustment (up to 90 mm under the worktable).

### Smart solutions

The tenoning unit is equipped with two vertical and one horizontal pressure cylinders for the work-pieces locking and the machining even of large elements.

### Total safety

Chipbreaker with 5 steps to operate in safety.

### Maximum performances as standard

The *formula ten 400e* machine version is fitted with spindle moulder unit including an electrospindle with HSK 63B rapid tool change.

sanders

**formula dg 60**

modular disc sander

**formula unilev 150**

universal sanding centre with  
oscillating vertical belt

## formula dg 60

## formula unilev 150

<b>Optional devices</b>				
Retractable table extension with rollers		-	-	O
Supplementary table for processing with rollers equipped with suction connection		-	-	O
Accessories kit		-	-	O
Rubber roller, 8 mm diameter, fitted with pin and ER32 collet chuck		-	-	O
Pneumatic roller, 70 mm diameter, with ER32 collet chuck		-	-	O
Pneumatic roller, 70 mm diameter, with shaft		-	O	-

# sanders machining units

Maximum practicality  
The worktable can be angled 45° guaranteeing an accurate sanding also of tilted profiles.

No limits to sanding  
The *formula dg 60b* machine version is fitted with sanding belt unit and horizontal pneumatic roller with 70 mm diameter.

Ideal for long work-pieces  
Possibility of tilting the belt unit for the processing of long work-pieces.  
*formula dg 60b*

### Flexibility and sturdiness

The machine is featured with a motor for the belt feeding with two speeds: 12 and 24 m/sec. Oscillating belt movement through dedicated motor and gear motor.  
*formula unilev 150*

### The best support for the work-piece

The mobile front extension makes easy the support of large dimensioned panels on the worktable.  
*formula unilev 150*

### Perfect sanding on shaped work-pieces

A machine even more flexible, with the tiltable worktable and the supplementary table equipped with rubber rollers and integrated dust extraction, ideal for sanding shaped work-pieces (it can be quickly installed and removed).  
*formula unilev 150*

### Solutions for every requirement

On the rear side of the machine, the worktable has an adjustable stop for the processing of tilted work-pieces. The belt can be adjusted in height for safe work-piece processing.  
*formula unilev 150*

# router formula router 800

formula		router 800
Spindle head and frame distance	mm	800
Variable spindle speed with inverter	rpm	3.000 ÷ 18.000
Motor power	kW	2,2
Voltage (3 ph @ 50 Hz)	V	380/400
Pneumatic shaft vertical stroke	mm	80
Number of revolving turret with adjustable stops		5
Stroke for vertical adjustment of the routing head	mm	65
Max. work-piece height (jig included)	mm	150
Worktable dimensions	mm	960 x 880
Max. table height from floor	mm	1000
Copying pin diameter	mm	8 - 10
Max. tool shank diameter	mm	16
Spindle collet chuck		ER25
Supplied collet for clamping tools with shank from 9 to 10 mm	n.	1
Max. tool diameter	mm	50
Max. tool length	mm	70
Exhaust outlet diameter	mm	80
Air consumption	m <sup>3</sup> /h	362

# router machining units

Simple and effective  
Routing head with electrospindle  
and vertical adjustment by  
means of handwheel.

User friendly  
The adjustable stop prevents the tool  
from hitting the worktable.

Effortless and dynamic  
The routing head is equipped with a 5-stop  
adjustable revolving turret for a quick  
setting of the working positions.

# band saws machining units

**Finish quality**  
A perfect cut result is assured by the top and bottom high precision blade guides. Practical machines suitable also to perform straight and tilted cuts on wood, plastic and aluminum.

**Safety first**  
Total safety machining with telescopic protections with rackwork to the blade.

**Solidity and sturdiness**  
The large dimensioned cast iron saw wheels, as well as the worktable, running on sealed for life ball bearings.

radial saws

# radial saws machining units

**Long-lasting functionality**  
The mechanisms of which the machine is equipped, as the protection cover on the arm column support, protect the mechanical parts from dust, guaranteeing the best operation over time.

**Optimal smoothness**  
The 8 sliding bearings on the guides grant the best carriage smoothness and an optimal support for a perfect cutting result.

**Absolute safety**  
The blade guard guarantees the absolute operator's safety.

## Maximum cutting accuracy

The cast iron structure provides the arm the maximum solidity and rigidity for the maximum cutting accuracy. The interchangeable sliding guides allow the operator a simple and rapid replacing, in case of wear, without direct intervention on the arm.

# structuring/ brushing machines machining units

**Easy set-up**  
Rapid pressure rollers adjustment through dedicated knobs.

**Simple working**  
Machining units lifting by means of handwheels and numerical readout.

**Effective solutions**  
Feed speed variation with mechanical speed variator for a simple and reliable solution.

**Perfect finishing**  
The double machining unit allows obtaining the request finishing in a single passage.

Best-in-class performance  
Superior adherence thanks to the  
rubber belt with vertical grooves.

Optimal  
extraction system  
The large diameter of the  
exhaust outlets grants an  
optimal dust extraction.

# cut-off saw formula cut 350

formula		cut 350
Worktable height	mm	800
Blade diameter	mm	350
Max. cross-cut capacity	mm	210 x 30
Max. working pressure	bar	8
Air consumption	NI/cycle	6
Exhaust outlets diameter	mm	80
Three-phase motor power	kW (Hz)	3 (50) / 3 (60)

# cut-off saw machining units

**The best cleaning**  
The exhaust outlets positioned near the dust evacuation areas ensure a fully cleaning of the working environment.

**Total safety**  
The blade guard and the other operator's protection systems, as the bi-manual hand-safety control, enable operating with total safety.

**Smart solutions**  
The machine is equipped with smart solutions as the optional stops and the pneumatic positioning.

# clamp formula clamp 2500

formula		clamp 2500
Working dimensions	mm	2500 x 1800
Vertical hydraulic cylinders stroke	mm	150
Thrust of each vertical hydraulic cylinders	kg	1270
Horizontal hydraulic cylinders stroke	mm	120
Thrust of each horizontal hydraulic cylinder	kg	770

# clamp machining units

## Ease-of-use

The quick vertical beams positioning system allows a very simple hydraulic cylinders adjustment.

## Solidity and sturdiness

Even more machine sturdiness with the lower cast iron supports.

## Maximum reliability

The hydraulic cylinders pressure is managed by practical levers and a control panel fitted with a valve with reading monometer and a locking cock for the cylinders pressure maintaining. The process is always under control.

horizontal  
mortiser

accessories  
**“minimax ease”**  
**mobile trolley**  
**for accessories**

Designed to store various accessories such as:  
surfacing fence, squaring fence, spindle moulder  
fence, spindle shafts, etc.

It consists of:

- upper table with bakelite surface that can be used also with piece support during processing
- two shelves with rubber surface
- rotating wheels with locking device

accessories

**thickening table  
extension to be used  
in infeed or outfeed**

It can be installed on the  
worktable end side.

Dimensions:

- 520 x 500 mm

- 630 x 500 mm

**tablet holder on the  
sliding carriage**

Compatible with tablets from 8" to 11".

# SCM OFFERS A FULL RANGE OF **HIGHLY SPECIALISED SERVICES** WITH A QUALITY AND RELIABILITY THAT STEM FROM 70 YEARS OF EXPERIENCE IN THE INDUSTRY.

From installation and production start-up to services and maintenance.

From training to the supply of specific original spare parts: **we provide solutions designed around you!**

## SERVICE AND MAINTENANCE

- Remote support
- Scheduled maintenance contracts
- Warranty extension

## TRAINING SERVICE

- Courses for machine operators
- Software and programming courses
- Training in production start-up

## SPARE PARTS

- Recommended spare parts list
- E-shop
- Interactive spare-parts catalogues
- Repairs on electronic parts, glue tanks and electro-spindles

## DIGITAL SERVICES

- Maestro Connect - IoT platform to be constantly connected with your machines
- Smartech - assistance with augmented reality
- My Scm portal - opening of service ticket and single point of access to the apps and Services tools

# THE STRONGEST WOOD TECHNOLOGIES ARE IN OUR DNA

## **SCM. A HERITAGE OF SKILLS IN A UNIQUE BRAND**

70 years of success gives SCM the centre stage in woodworking technology. This heritage results from bringing together the best know-how in machining and systems for wood-based manufacturing. SCM is present all over the world, brought to you by the widest distribution network in the industry.

**70** years history

**3** main production sites in Italy

**300.000** square metres of production space

**20.000** machines manufactured per year

**90%** export

**20** foreign branches

**400** agents and dealers

**500** support technicians

**500** registered patents

**In SCM's DNA also strength and solidity of a great Group.** The SCM Group is a world leader, manufacturing industrial equipment and components for machining the widest range of materials.

## SCM GROUP, A HIGHLY SKILLED TEAM EXPERT IN INDUSTRIAL MACHINES AND COMPONENTS

### INDUSTRIAL MACHINERY

Stand-alone machines, integrated systems and services dedicated to processing a wide range of materials.

WOODWORKING TECHNOLOGIES

TECHNOLOGIES FOR PROCESSING  
COMPOSITE MATERIALS, ALUMINIUM,  
PLASTIC, GLASS, STONE, METAL

### INDUSTRIAL COMPONENTS

Technological components for the Group's machines and systems, for those of third-parties and the machinery industry.
