

Compact laminating machine for reel laminating with hot glue on foil

Máquina laminadora compacta para laminado en bobina con colas termofusibles sobre folio

Compact line foil

Single sided laminating machine for the application of hot melt glues on foils. The machine includes an unwinding set, a calender with cold NATURAL RUBBER rollers for the immediate application and pressing of the foil and a rotative cut system to separate the boards when using certain kind of foils.

Máquina laminadora compacta unilateral para la aplicación de cola termofusible (PUR o EVA) sobre el folio de papel, PVC y laminados de baja presión (CPL).
